

WILLIAMSON COUNTY GOVERNMENT

April 28, 2022

**Addendum #1 Folded PVC Pipe Liner
Addendum #2 Spray Applied Liner
Bid Date May 12, 2022**

Williamson County has received the following question:

Q. There are quite a few activities required in order to line the pipes that are site specific. Among these are: Traffic Control, Stream Diversion, Pipe Cleaning and Debris Removal, Erosion Control, Permits, CCTV pipe inspection, Pipe Repair and, site restoration. All of these items will not be required at every site but, most likely, some of them will be needed on every project.

Since there is no way to predict with any accuracy which items will be required, or to what extent, it will be difficult to include everything in the unit prices for the linings and could inflate the pricing. Could this issue be addressed?

A. Additional requirements will be addressed for the specific projects.
