Question 1:

The RFQ states that this effort will update the existing model. Can you tell us who created the original model and what software platform was used in its creation, SWMM 5.0, PCSWMM, or another?

Answer:

Arcadis created the model which was developed using PCSWMM version 5.1.015 and is fully compatible with the United State Environmental Protection Agency's (USEPA) Stormwater Management Model Version 5 (SWMM5) software.

Question 2:

The RFQ states, " Utilize and work with the city to improve current asset management approaches within software currently familiar to the city.". Can you provide a list of the software(s) that are being used by the City in its current asset management efforts?

Answer:

The City currently utilizes "OpenGov | Asset Management" (fka Cartegraph) for its CMMS system. Other software the City currently utilizes for sanitary asset management are standard Microsoft products.
