RE: Addendum No. 4, dated July 9, 2020

This Addendum modifies the original RFP Documents dated May 2020.

This Addendum consists of two (2) pages.

Add 4.1 Due Date

Per Addendum 3, proposals are due on or before **July 14<sup>th</sup> 2020 at 2:00pm (EST)**.

Add 4.2 Questions and Responses

Q: The RFP is not clear that it requires a current traffic study to validate the concept report findings but has statements in it indicating an updated traffic study?

A: Per GDOT, an updated traffic study would only be required if the project does not move into construction phase by 2024, or if the consultant's proposed design deviates from the approved concept report.

Q: The traffic diagrams were established as Open Year - 2022 and Design Year – 2042. Do these need to be updated to 2025 and 2045?

A: Per GDOT, revising the open year and design year is only required if the project does not move into construction phase by 2024.

Q: The RFP states that all capacity analysis is to be provided for all schematic site plans. Does this mean just for any revisions or all current viable alternatives too?

A: Per GDOT, an updated capacity analysis would only be required if the project does not move into construction phase by 2024, or if the consultant's proposed design deviates from the approved concept report.
