

**Development Authority of Lumpkin County RFP #2022-01 Proposals for Trail Construction**

**Recreational Trail Program Manual:**

**Erosion control clarification:**

During the construction, the trail should be finished and packed as work is completed. The intention is that as long as it is stabilized during construction, no silt fencing would be required. There are potentially areas of the trail that will require permanent erosion control.

**Boardwalk clarification:**

The boardwalk is not being constructed in this phase of construction. The response should simply include an estimate of construction (potentially a range based on conditions) in the event the project is able to do a phase 2.

If approved at a later date, the county would require structural determination for public use, which would include engineered plans.

**Architectural barriers act clarification:**

The proposal should state the project has requested *exemption* from the Trail Accessibility instead of the requirement adhere to as stated on page 3 of the Request for Proposal. Exemption was requested based on the following considerations:

1. Compliance not practicable due to terrain
2. Compliance cannot be accomplished with the prevailing construction practices,
3. Compliance would fundamentally alter the function or purpose of the Facility or the setting.

**Use of federal funds/Recreational Trail Program rules and regulations clarification:**
