

**Addenda 2 – March 7, 2022**

**Development Authority of Lumpkin County RFP #2022-01 Proposals for Trail Construction**

**Is the contractor required to build just the frame for the 2 kiosks or are they responsible for that plus collecting that data and information for them?**

The contractor will just build the frames. The Development Authority staff will work with a local historian and other staff to collect data and information to provide the signage vendor.

**There's no mention of a map of the trails for the kiosks in the RFP, is that to be included?**

Development Authority staff will work with the Lumpkin County GIS Administrator to create trail map for the kiosks.

**Will the contractor be responsible for designing and obtaining the signs that will be placed in the kiosks?**

If a contractor has relationships with a sign company that could be considered as a part of the bid, that would be helpful.

If the trail contractor does not have a relationship with a sign company that could be considered as a part of the response, it should just be noted the response does not include any of the trail wayfinding or kiosks scope of work.

**Is the contractor responsible for providing the trail route ID and distances on the wayfinding sign posts? If so, will guidelines be provided?**

The intention is that the wayfinding trail markers have a route ID and distance (like the image included in the original RFP).

If the trail contractor does not have a relationship with a sign company that could be considered as a part of the response, it should just be noted the response does not include any of the trail wayfinding or kiosks scope of work.
