**Addendum #2 for Dump Trucks Bid  
For Highway Department  
Bid Opening Date September 21, 2017**

Following are questions/responses and clarifications regarding the above bid:

**Please add to the dump body specifications:**

- Protective Coating- Entire undercarriage of truck and bed to have protective undercoating
- Controls- Controls for dump bed to be positioned forward so driver does not have to reach back to operate.
- Install snow plow lights

In the Dump Body Specifications under "Extras":

Question: They are requesting a 8" channel push bumper with 3" pipe, bolt on. Traditionally, a push bumper is attached to the front of the truck so they can "push" with it. Since this item is on the dump body spec and not chassis spec, are they referring to what is known as an asphalt lip on the rear of the body?

**Answer:** YES

**And: change "Allison Automatic Transmission" to "Allison 4500 Automatic Transmission".**
