

**Windows 10 2-in-1 Device and Charging Carts RFP Q&A Round 2**  
**4/11/17**

We received the following question about the Windows 10 2-in-1 charging carts for our open RFP:

1. What are the dimensions of the devices that are being considered? (Namely the thickness/depth of the devices- that will determine the slot width needed for the carts).

The device maximum dimensions would be 9 inches (height) by 12 inches (width) by 1 inch (depth).

2. Would the devices eventually have cases whose size needs to taken into consideration (slot width)?

Cases are not required.

3. Are all 18 shipping to the same location (with loading dock?) or inside delivery to multiple locations needed?

Most likely the same location with a loading dock at our warehouse which is located at 1060 Harrison Road, Colorado Springs, CO 80905.

Thank you.
