\*Graham County Land Co. had a different figure on their bid form as well; their number of dirt road center line miles & paved road right of way center line miles multiplied by their cost per center line mile of \$600.00 equals \$487,800.00. This figure for three years equals a total base bid of \$1,463,400.00. The above figures were used because annual figures equal the written total base bid on the bid form.
