

**Anderson County Electronic Monitoring Program
Request for Proposals # 2301
Questions & Answers #2**

1. I understand that the county previously did not use the GPS electronic monitoring services, and previously contracted through PS Probation to facilitate those services.

You mentioned that STOP was the previous provider, contracted through PSI Probation. It would be extremely beneficial if we could have access to the number of individuals who were ordered to GPS monitoring (with STOP and contracted through PSI Probation) so I can provide the most cost-effective pricing in my RFP.

Answer: An estimated 15 – 20 people were monitored during the last two years. However, this is not indicative of the future of the program as both Judges that previously used the program will no longer be on the bench effective September 1, 2022.
