

## Addendum #1 for Lighting Improvements to Athletic Fields

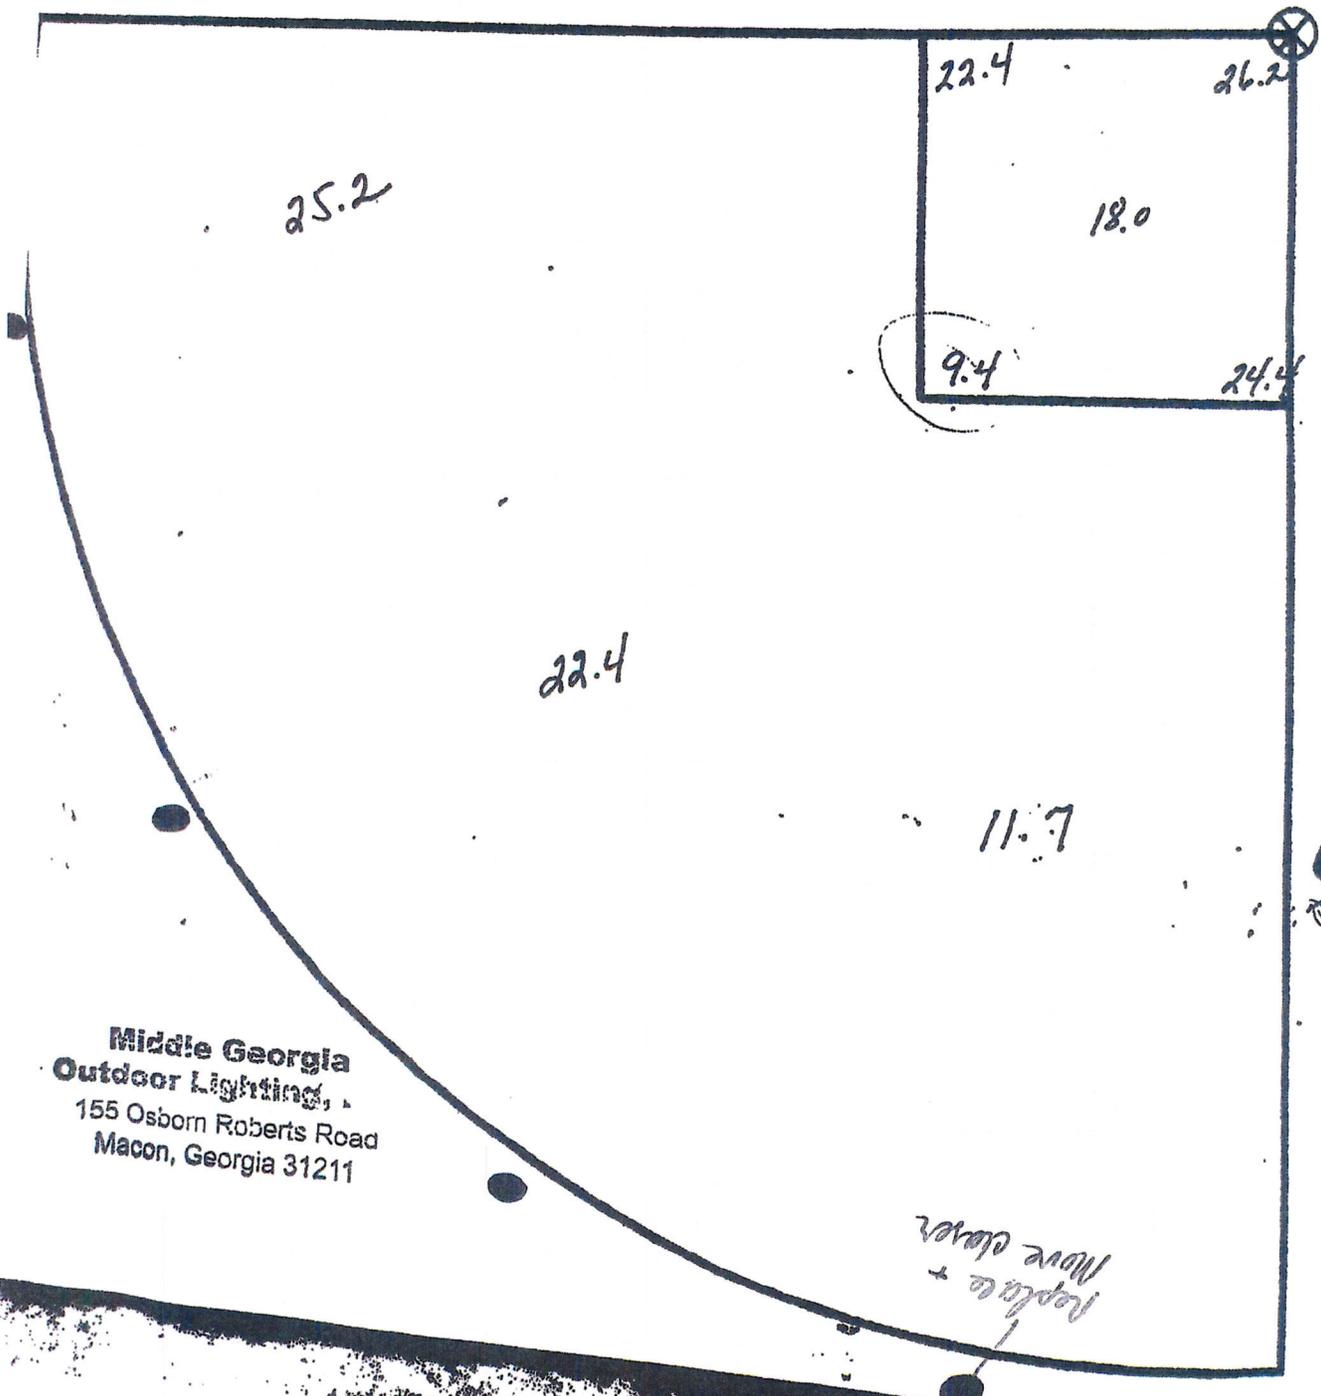

The following are questions we have received:

1. Your Commissioners have allocated \$90,000 for upgrade work on (3) fields. This seems unrealistic to complete such work. Question: What do you mean with the words in the sentence italicized below? Do you expect to upgrade all (3) fields? *Jones County has a total of \$90,000 available for the completion of this project. All proposals shall state the price associated with the proposed work, and all proposals shall not exceed the \$90,000 available for the project.* **We understand that this is a very limited budget to upgrade lighting on three fields. We are asking vendors to submit their best solution to address these issues. If a vendor feels like the best use of the available funds would be upgrading only one or two fields, we would certainly welcome proposals along those lines.**
2. Last, our company would love to address this RFP and future LED sports lighting upgrade opportunities so what is necessary to add our firm to your registry for future RFP's, RFQ's or Bids? **Please go to [www.jonescountyga.org](http://www.jonescountyga.org) and click on the "Vendor/Contractor" link to sign up on our Vendor Registry site.**
3. The SOW section states there are 3 fields needing upgrading. If this is correct can we please have the address to all 3 to be sure which is which a. Curtis Field, McDaniel Field, and Chapman Field. **All 3 fields are located at the Morris Bank Recreation Complex – 146 Recreation Rd, Gray, GA 31032.**
4. Can you please provide the Drawing mention in the SOW section indicating the light levels required. **We inadvertently left the drawing out of the documents. Please see attached which shows current lighting levels. We do not have a drawing showing requested light levels.**
5. Is there an existing control systems? **There is no control system in place.**
6. Is Georgia Power your electric provider? **No. Electric service at this site is provided by Tri-County EMC.**
7. Are you interested in changing out your parking pole lights or wall packs to LED as well? **If the budget permits, we may be interested in these upgrades.**
8. Are there any specifications on lighting fixtures for this project? **No specifications for lights are provided in this RFP. We are asking vendors to provide their best solution given the budget limitations outlined in the RFP document.**
