

ADDENDUM “A”

RFB #17-0807 For Upgrade to Courthouse Video Surveillance System

THIS ADDENDUM HEREBY CLARIFIES, MODIFIES, or RESPONDS to QUESTIONS received regarding the **Randolph County Upgrade to the Courthouse Video Surveillance System Bid# 17-0807** issued on Monday, August 7, 2017. This addendum is being issued to notify potential Vendors of changes, additions, or needed clarifications that are being made to the Request for Bid # 17-0807.

The following is a question that has been received by Randolph County and the County’s response:

Question 1: *In each IDF/MDF rack, are we using the existing UPS or do we need to supply one at each?*

Answer: You may use the existing UPS available. If it is not sufficient for any additional equipment added, Randolph County will be responsible for upgrading the UPS.

Question 2: *As for the fiber from floor to floor, will the County be responsible for that connection between racks? All we need to supply is from the fiber box to copper on POE switch?*

Answer: The successful bidder will need to supply the appropriate fiber patch cables and optics to utilize the existing Multi-Mode fiber/fiber patch panels that reside in each IDF that all terminate to the MDF on the second floor. The fiber terminations are all SC in the patch panels.

Question 3: *What is the existing software for the camera system?*

Answer: The existing software is a proprietary software from the manufacturer of the NVR. The model of the device is part of the RFP.

Question 4: *What is the configuration for the monitor system that is installed?*

Answer: Each monitor had the ability to display a specific camera. This is selected and controlled via one of the two remote control pads.

Question 5: *Do you have a product line in mind for the new cameras?*

Answer: This will be at the discretion of the bidder.

Additional Information: All work must meet local building codes and IEC standards.
