DATE: January 8, 2024  
TO: Interested Firms  
FROM: Breanna Pierce, Procurement Specialist  
SUBJECT: Addendum 2 to Quote Request, 39361 – Refurbish Walkways/Platforms In Upper Basin Indian River and Brevard County

As a result of questions received from potential respondents, please be advised of the following changes to the subject Request for Proposal:

1. The time and date for the submittal of responses remains the same: **2:00 p.m. Thursday, January 18, 2024.**
2. **Question:** What was the winning bid for the last remodeling of these similar sites?  
**We do not have a similar project that has been completed recently. The last project that we did the contractor provided the material for 3 walkways of varying sizes. The total price was \$38,000.00.**
3. **Question:** Is the material true 2 x 6 (2" thick) or (1.5" thick)?  
**The material is 1.5" x 5.5".**
4. **Question:** Do you require an actual (countersink) for the screws or do you just want the head of the screws ran in below the surface of the wood at least 1/16"?  
**Below the surface of the wood**
5. **Question:** 1/4" screws does not seem correct. Inspecting some recent remodeled boardwalks, the decking is installed with more common #10 screws (1/4 is #14). 1/4" screw is 20% of the width of the stringers being used (1 1/2" thick). 305 stainless (recommended for freshwater) screws 1/4 x 5 inches are over \$1.10 each, when purchased in bulk. It takes at least 6 of these for each decking board. If 1/4" screws are used, all holes will have to be pre-drilled or stringers will surely split. Are the 1/4 stainless screws requirements, correct??  
**In lieu of using the 1/4" screws, we will be using stainless steel #10 3/16" x 3 1/2" "deck screws".**

**NOTE:** Please acknowledge receipt of this Addendum in your submittal.
