041-LJC-PRO- BLK	Lock-Jaw Pro Collar (Pair) – in addition to what was already in the bid	8

2) It says the Ultra Tile will be approximately 53' 7" x 35' 7" and 10' X 51' for the turf. Assuming this means the room's dimensions are 53' 7" by 45' 7" in total? So roughly 2,445 square feet? I want to make sure I draw the room up accurately in 3D software as well as submit accurate flooring estimates. **The weight room space is appr 53' 7 3/16" x 35' 7 3/16", the turf will be apart of that total measurement, and the remaining flooring with the be Ultra Tile.**

- Do you have any blue prints or pictures so I can accurately represent doors, windows, water fountains, structural poles, etc.. in drawing? Want to ensure efficient and safe traffic flow and walkways. **Please see attached.**

- I attached a .png file for the Emerald High School shield logo. Is this the appropriate logo for the turf? **Please see attachment.**
