

## TYPICAL JOINT USE TRENCH SECTION

**S = Sewer Main**

**G = Gas Main**

Notes:

1. City crew will be on site with contractor to weld and place gas piping, tracer wire, and warning tape in joint use trench.
2. Provide separation from trench wall and other conduits as needed to provide proper compaction.
3. Backfill under roadways shall be #810 granite screenings.
4. Backfill shall be clean and free from material with sharp edges and properly compacted.
