We continue to operate under extremely volatile market conditions affecting material prices and availability. Pricing and lead times must be confirmed at time of order. Seacoast Supply is not liable for delays, cancellations or price increases beyond our control. ***The Russian-Ukraine conflict has caused a severe shortage of pig iron in the international market (as both countries are two of the top producers in the world). This shortage has resulted in an immediate and intense demand for all grades of US Scrap, which is used to produce Ductile Iron pipe. Due to this increase our manufacturers have implemented an immediate metal surcharge. The surcharge will be applied at time of shipment and will change with the market. Currently, these surcharges can be estimated at approximately \$150 per ton, but subject to change with the monthly metal index. The charge will be invoiced as a separate line item. We strongly urge that estimators, contractors and owners plan for this contingency. *****Please contact your salesman directly for more information on this development.
