

## Q & A

### RFB 2022-21 Dig-to-Block Guy Tower Anchor Inspection

1. How many anchors does the tower have? **9, 3 per cable leg with 3 cable legs**
2. The way the spec reads, I am unsure if it is asking for 1 anchor to be inspected or all anchors to be inspected. Please verify. **All 9**
3. What type of anchors are currently installed - **see photos attached below**
4. What are the sizes of the guy wires? **Looks like 3/4 inch?**
5. Are the anchors grounded - **Not separately**
6. Is the tower located in a congested area? **No**
7. Does the tower site have easy access - **Yes, may need tree / brush work to get to and around all anchors**
8. Do you have pictures of the tower / tower site that you could share with us - **yes see photos attached below**
9. Can you share the last inspection report with us - **obtaining new inspections**
10. Are you looking for pricing for just the anchor inspection at this time or are we supposed to include cost to replace the anchors if they are bad? **yes with cost to replace.**
11. Can you share with us the tower and foundation drawings? **We do not have the drawings but it is a Rohn Standard 80 Guyed Tower I believe. I have reached out to Rohn to see if they have anything on file but that may be tough. They also may charge. We will see.**
