

1. The size of the area that is available for this playground? *The entire lot is available.*
2. The address of the park is 425 Janette Drive, Goodlettsville, but was hoping you could help me understand the exact location of the playground? *An exact location has not been determined on the site. Other amenities will be worked around the awarded design.*
3. Do you intend for the independent pieces and/or playground structure to be designed for ages 2-5 or 5-12? *A 5-12 structure would be preferred, however, if that is submitted, independent pieces for the 2-5 age group would need to be included in the design, and vice versa.*
4. What swing seats do you desire on the to-fro swings? Molded rubber belt seats, Molded rubber tot seats, Inclusive, etc. *This would be up to the designer of the playground – with this being a neighborhood park, pieces selected for the proposal should be done with thoughts of equipment for ages represented.*
5. What sort of safety surfacing are you going to be using for the playground. *Pre-engineered wood fiber is the preferred surfacing. It is to be included in the scope of the project as referenced in Section II, A.*
6. This lot could be developed to contain future amenities in addition to a playground area. Is there a Master Plan for this site which should be considered for positioning the playground? *There is no Master Plan for this site.*
