SUBJECT: Report of Phase I Environmental Site Assessment and Hazard Assessment
Riley Elementary School
3522 Greenbriar Road
Macon, Bibb County, Georgia
GEC Project No.: 150587.241

Dear Mr. Daniel:

Geotechnical & Environmental Consultants, Inc. (GEC) has completed a Phase I Environmental Site Assessment for the above referenced site in general accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments. As required by the Practice, our evaluation included a records review, site reconnaissance, and interviews as detailed in the attached report. The purpose of this study was twofold: to evaluate the site suitability from an environmental standpoint, and to evaluate the potential impact of hazards on the Riley Elementary School site.

GEC appreciates the opportunity to provide our professional services to you. If you have any questions concerning this report, or if we can be of further assistance, please feel free to contact our office.

Sincerely,
GEOTECHNICAL & ENVIRONMENTAL CONSULTANTS, INC.

Subject: Site Evaluation

Mr. Daniel,

As part of my review of Bibb County's site application for the new elementary school #4, I have reviewed the Hazard Report in the Phase I ESA conducted by GEC. On page 17 of the report GEC notes there is a hazard from a Thermal Radiation Fireball. The reports shows the facility site falls within the 4,026 feet impact zone from the fireball. But, the report does not address this hazard within its mitigation statements. I need GEC to provide an amendment to address this hazard. Once you have received this statement please forward it to me at the DOE.

If you have any questions, Please feel free to contact me.

Thanks

**SUBJECT: Response Letter of Environmental Site Assessment
Hazard Evaluation**

Riley Elementary School (New Elementary School #4)
3522 Greenbriar Road
Macon, Bibb County, Georgia
GEC Project No.: 150587.241

Dear Mr. Daniel:

As you know, Geotechnical & Environmental Consultants, Inc. (GEC) previously completed a Phase I Environmental Site Assessment (ESA) for the above referenced site. The ESA included a Hazard Assessment of potential hazards associated with the construction of a school facility on the property. Pursuant to the issuance of the report, comments from the Georgia Department of Education regarding the recommended mitigation measures of the study were received. Because of the comment, GEC has reexamined the recommended mitigation measures on the property.

The comment in the DOE review was that there is a hazard from a Thermal Radiation Fireball. The report shows that the facility falls within the 4,026 feet impact zone from the fireball. But, the report does not address this hazard within its mitigation statements.

The following addresses our reevaluation of the mitigation measures.

Due to the proximity of the nearby highway to the school site, mitigation measures should be considered. Mitigation measures help to alleviate concerns from a potential identified hazard; however, they are not “guaranteed” to prevent the hazard from affecting the school or its’ students, workers and visitors. The following are recommendations and approved methods of mitigation for potential hazards, as provided for in the Georgia Department of Education “Guideline for Risk Hazard Assessment of Educational Facility Sites”, that we feel would be beneficial to the project.

- Emergency preparedness plan - the potential hazards identified in our study should be incorporated into the school's Comprehensive Emergency Preparedness Plan.
- Evacuation- Evacuation routes and procedures for the identified hazards should be included in the plan.
- Windows should be shatter proof or shatter resistance to minimize breakage and concerns due to potential flying glass.
- Engineering Controls- The installation of a control to provide an emergency shutoff to eliminate the intake of outside air and to provide positive indoor air pressure should be considered. The shutoff could be implemented if a tanker truck accident were to occur at the highway.
- Walls should be reinforced or evaluated by a structural engineer so that the walls can withstand the potential blast pressures.

While the assessment indicates that the subject property is within the high threat zone for thermal radiation from a fireball, it should be noted that the assessment is considering the worst-case scenario that the explosion would occur at the point nearest and upwind of the school. While it is difficult to determine the likelihood of such of an occurrence, it should be considered remote.

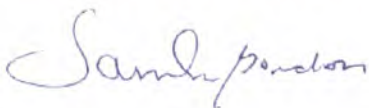

Based on this information, GEC is of the opinion that since the property is located approximately 2,100 feet southeast off the road and since there is a number of buildings and wooded areas between the hazard and the site, it is unlikely that this hazard would have an effect on the buildings located on the property.

It is GEC's opinion that the above noted hazard is not such that it would preclude the construction or renovation of the school. Therefore, based on GEC's findings, GEC feels that the subject property is a suitable site for the school.

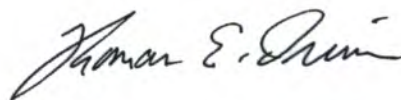

GEC appreciates the opportunity to provide our professional services to you. If you have any questions concerning this report, or if we can be of further assistance, please feel free to contact our office.

Sincerely,

GEOTECHNICAL & ENVIRONMENTAL CONSULTANTS, INC.

1.0 EXECUTIVE SUMMARY

Mr. Jason Daniel with Macon-Bibb County Board of Education retained Geotechnical & Environmental Consultants, Inc. (GEC) on behalf of Macon-Bibb County Board of Education to perform a Phase I Environmental Site Assessment (ESA) on the subject property (as defined in Section 3.1 of this report). GEC is not affiliated with Mr. Daniel, Macon-Bibb County Board of Education, or Board of Education (the current owner of the property).

While conducting the Phase I ESA of the subject property, GEC followed the Georgia Department of Education (GDOE) Facilities Services Unit documents entitled "Guideline for Risk Hazard Assessment of Educational Facility Sites" (the "Guideline"). The GDOE requires a hazard assessment to be conducted if the Phase I ESA discovers any of the 20 hazards listed in the Guideline (see complete list in Section 2.2) and outlined in the GDOE documents within the recommended radii of the proposed site.

The GDOE Phase I ESA was performed in accordance with the American Society for Testing and Materials (ASTM) E 1527-2013, Standard Practice for Environmental Site Assessments and their updates. The ASTM E 1527-2013 is the most current ASTM standard for this work. The Phase I ESA consisted of a site reconnaissance of the subject property, review of applicable and reasonably ascertainable information about the subject property, and interviews with selected officials knowledgeable about the subject property. The Phase I ESA was intended to provide an overview of environmental conditions at the subject property resulting from current and/or past site activities.

The user of this report should read the entire report for detailed descriptions of the property and the observations and judgments made by GEC. The user is ultimately responsible for assessing whether the limitations of the ASTM Practice and this project's scope of work are appropriate to the level of risk the user assumes for the subject property transaction.

Interviews and review of reasonably ascertainable records by GEC during the completion of the Phase I ESA did not indicate past usage or conditions which would likely result in significant environmental concerns. No recognized environmental conditions (RECs), as that term is defined in the ASTM standard, were identified on the subject property.

During GEC's site reconnaissance on March 29, 2018, GEC observed the site to consist of Riley Elementary School. The school buildings, playground, and parking lots are located on the northern portion of the site. Wooded areas were observed along the western and southern property boundaries with the remainder of the site consisting of open land. GEC observed no visual signs of hazardous substance or petroleum contamination (stressed vegetation and/or significant stains or odors) on the subject property. In addition, no odors, and/or pits/ponds, or lagoons associated with waste treatment were observed on the site.

Conditions affecting future use of the school are the potential existence of lead-based paint (LBP) and asbestos containing materials (ACMs). The potential existence of LBP and ACMs must be considered in accordance with all state and federal regulations for any renovation or demolition project.

GEC found **one** of the 20 GDOE hazards located within the required search radii of the subject property: a highway (Log Cabin Drive). Refer to the Hazard Assessment portion of this assessment (Section 8.0) for further details.

Based on the research and conclusions of this assessment, no additional environmental assessment is deemed appropriate at this time. It is our opinion that the site is suitable for the proposed a proposed addition to the school provided the recommendations contained herein are followed.

Since no assessment can absolutely deny the existence of hazardous materials, especially surficial environmental assessments with limited or no subsurface sampling, existing hazardous materials can escape detection using the customary methods. The conclusions of the environmental assessment are based on conditions as observed on our site visits and historical information about the site. Future changes in environmental conditions and site characteristics may occur with the passage of time, in which case, the conclusions of this report may have to be reevaluated.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA report is to permit the user to satisfy one of the requirements to qualify for the innocent landowner defense under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This is also known as one of the "landowner liability protections" or "LLPs" in the Practice. This practice constitutes the "all appropriate inquiry" (AAI) into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 USC §9601 (35) (B).

2.2 Detailed Scope of Services

This Phase I ESA was conducted in general accordance with ASTM E 1527-2013 Standard Practice for Environmental Site Assessments. GEC's scope of work for this Phase I ESA was to identify "recognized environmental conditions" to the extent feasible by the processes outlined in Practice E 1527 and in general accordance with good commercial and customary practices for conducting an environmental site assessment of a parcel of land with respect to the range of contaminants within the scope of CERCLA and petroleum products.

Practice E 1527 defines "recognized environmental conditions" (RECs) as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions (RECs).

The scope of Practice E 1527 does not include any testing or sampling of materials (e.g., soil, water, air, or building materials). Furthermore, GEC's scope of work for this Phase I ESA did not address ASTM non-scope items such as asbestos containing materials (ACMs), radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural & historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or for indoor air quality issues such as, biological agents, or mold.

The Georgia Department of Education (GDOE) provides the secondary guidance publications for the Phase I ESA. "Guideline for Risk Hazard Assessment of Educational Facility Sites" (the "Guideline"), focuses on non-ASTM potential hazards to successful school sites, and assists school boards in understanding and completing the forms in the Guide and provides specific direction for conducting the hazard assessment. The GDOE publication is this agency's most current standard. For the purpose of this Phase I ESA, GEC followed the GDOE Facilities

Services Unit document and looked for the listed hazards. These hazards include: **(1)** Electrical transmission lines rated at 115kV or higher; **(2)** Oil or petroleum product transmission lines and storage facilities; **(3)** Hazardous chemical pipelines; **(4)** Natural gas transmission and distribution lines larger than ten inches in diameter with a pressure of 200 psi or more; **(5)** Propane storage facilities; **(6)** Railroads; **(7)** Major highways; **(8)** Airport approach or departure paths; **(9)** Industrial or Manufacturing facilities: (a) Using or storing hazardous substances as defined under Title 40 CFR 262; (b) Emitting hazardous air pollutants as defined under the "Clean Air Act;" and/or (c) 1990 "Clean Air Act Amendment" – Risk Management Section 112(r); **(10)** Lakes, rivers, dams, reservoirs, or other bodies of water; **(11)** Potential flooding because the property is located within the 100 year flood plain or dam breach zone; **(12)** Nuclear waste storage facilities; **(13)** Munitions or explosives storage or manufacturing; **(14)** water towers adjacent to the site; **(15)** active or abandoned mines or quarries; **(16)** remedial hazardous waste sites; **(17)** Landfills and dumps; **(18)** treatment plants; **(19)** power plants; and **(20)** military installations.

The Guideline further defines relative distances for identifying the noted hazards listed in the Guide. Water bodies on or adjacent to a site and/or upstream of a site are hazards. Power lines are a concern within 300 feet of a site and must be greater than 300 feet away from the portion of the site to be used for facilities or where students gather. Landfills, gas stations, electrical substations, and highways within ½-mile of a site; dry cleaners, fuel and chemical pipelines, large fuel facilities, industrial facilities, power plants, and railways within one mile of a site; and airports and nuclear facilities within three miles need to be assessed. Based on the GDOE document, if any of these hazards are noted within the GDOE recommended radii of the proposed site, then a Hazard Analysis may be required.

GEC's methodology for performing environmental evaluations consists of two phases. The Phase I involves four components: a records review, a site reconnaissance, interviews, and a report of findings. Phase II consists of drilling operations, soil, groundwater and/or surface water sampling, and laboratory analysis of the samples collected as appropriate, based on the results of the Phase I ESA or in response to the special needs of the client.

GEC performed each of the four components (records review, site reconnaissance, interviews and a report of findings) of the ASTM E 1527 Phase I ESA in general accordance with Sections 6.0 through 12.0 of the Practice. The objective of the records review, site reconnaissance, and interviews is to obtain information used to identify RECs in connection with the property.

2.3 Significant Assumptions

The following assumptions were made by GEC in the preparation of this report. GEC relied on information derived from secondary sources including governmental agencies, the client (User), designated representatives of the client, property contact, property owner, property owner representatives, computerized databases, and personal interviews. Except as identified in this report, GEC has made no independent investigation as to the accuracy and completeness of the information derived from secondary sources. GEC assumes that information provided by or obtained from governmental agencies is accurate and complete unless proven otherwise during the study. Groundwater flow and depth to groundwater, unless otherwise specified by on property well data, are assumed based on contours depicted on the USGS topographic maps and field observations. GEC assumes that the property has been correctly and accurately identified by the client and others associated with the project. GEC assumes that the client, property owner, interviewees and others providing information on the property used good faith in answering questions and in obtaining information relative to the subject property.

2.4 Limitations and Exceptions

The conclusions of this Phase I Environmental Site Assessment are based on conditions as observed on our site visit and on historical information about the site. Information contained in this report was obtained by means of document review, interviews, and on-site observations. The conclusions presented in this report are our professional opinions based on our findings obtained in general accordance with customary practices, principles, and methodologies utilized in the fields of environmental science. Since no assessment can absolutely deny the existence of hazardous materials, especially surficial environmental assessments with limited or no subsurface sampling, existing hazardous materials can escape detection using the customary methods. Future changes in environmental conditions and site characteristics may occur with the passage of time, in which case, the conclusions of this report may have to be reevaluated.

2.5 Special Terms and Conditions

The Phase I Environmental Site Assessment was prepared in accordance with the stated and agreed upon Scope of Work. This report was specifically and only prepared for the identified specific client (user) and their designees and for their specific purpose; no other person or entity for any other purpose may use or rely on this report or its contents unless specifically authorized in writing by GEC. No other special terms and conditions are applicable to the Phase I Environmental Site Assessment.

2.6 User Reliance

This report is intended for the use of Mr. Jason Daniel, Macon-Bibb County Board of Education, and their representatives for their use in evaluating the environmental liability associated with the subject property. GEC is not affiliated with Mr. Daniel or the Macon-Bibb County Board of Education (the current owner of this property). GEC is not responsible for opinions, conclusions, or recommendations made by others based on the findings in this report. This report and its findings shall not, in whole or in part, be disseminated to any other party, or used by any other party without the prior written consent of Geotechnical & Environmental Consultants, Inc.

3.0 SITE DESCRIPTION

The following sections describe the subject site as it was encountered during the site reconnaissance, performed on March 29, 2018, as part of this ESA, or based on information reviewed as part of this ESA (from sources described within this report).

3.1 Location and Legal Description

The subject site is contained within tax parcel number N081-0042 and located at 3522 Greenbriar Road in Macon, Bibb County, Georgia. A site location map is included in Appendix I as Figure 1.

The subject property is legally described in the most current available deed at the Clerk's Office, Bibb County Superior Court.

3.2 Site and Vicinity General Characteristics

The property is a developed lot containing the Riley Elementary School building. The properties immediately surrounding the subject site consist of residential and wooded land. Residential properties are located to the north of the site beyond Greenbriar Road and to the east beyond Brinwood Drive. Wooded land borders the site to the west and south followed by additional residential properties.

3.3 Current Use of the Property

The subject property is currently occupied with Riley Elementary School.

3.4 Descriptions of Structures, Roads, Other Improvements on the Site

Several one-story school buildings were located onsite. The onsite structures consisted of brick exterior buildings with asphalt shingle roofing. The interiors contain sheetrock walls and tile flooring. The remainder of the site consisted of paved driveways and parking areas, a playground, and green space. The surrounding improved roadways include Greenbriar Road, which borders the site to the north, and Brinwood Drive, which is located to the immediate east of the site. According to various sources, municipal water and sewer serve the subject site. Electric HVAC units serve the building.

3.5 Current Uses of Adjoining Properties

The properties immediately surrounding the subject site consist of residential and wooded land. Residential properties are located to the north of the site beyond Greenbriar Road and to the east beyond Brinwood Drive. Wooded land borders the site to the west and south followed by additional residential properties.

4.0 USER PROVIDED INFORMATION

4.1 Title Records

In an effort to obtain information on the subject property, GEC reviewed information concerning the subject property at the Bibb County Tax Assessor's website. The subject property is contained within tax parcel N081-0042 and located at 3522 Greenbriar Road in Macon, Bibb County, Georgia. The property tax information card indicates that the owner of the property is the Board of Education. The review of the ownership information did not indicate previous ownership site activities that would be expected to have created environmental concerns on the subject property.

Copies of the property information is presented in Appendix III.

4.2 Environmental Liens or Activity and Use Limitations

The User did not provide GEC with any information regarding environmental liens or activity and use limitations in association with the subject property, nor did the client request that GEC perform a search for environmental liens and use limitations be performed.

The property records reviewed by GEC did not indicate any environmental liens or any activity or use limitations,

and the Users and/or local public agency contacts reported none.

A copy of the property record card is presented in Appendix III.

4.3 Specialized Knowledge

GEC was not provided any specialized knowledge or experience material to recognized environmental conditions in connection with the subject site.

GEC provided our client a copy of the user questionnaire. At the time of issuance of the report, a response from the department was not received. GEC does not expect information from the owner to affect the conclusions of this report.

4.4 Commonly Known or Reasonably Ascertainable Information

GEC was not provided any common knowledge or other reasonably ascertainable information demonstrating recognized environmental conditions in connection with the subject site.

4.5 Valuation Reduction for Environmental Issues

The User did not indicate or provide any information regarding valuation reduction due to environmental issues, nor have any environmental issues been identified while conducting this Phase I ESA, which would affect the property valuation.

4.6 Owner, Property Manager, and Occupant Information

Based on information provided by the User or reviewed during the course of this ESA, the current property owner is the Board of Education. The Property is currently developed land.

4.7 Reason for Performing Phase I

GEC was asked to perform a Phase I ESA (as a prerequisite to funding for a proposed addition to the school) in accordance with the current ASTM-E 1527-2013 standard and to identify RECs that could impact the property's financial liability.

4.8 Other

Previous Environmental Studies

GEC is not aware of and did not identify any previous environmental studies on the subject site. In addition, the User did not indicate or provide GEC with any previous environmental studies, regarding the subject site.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

GEC contracted with a commercial database reporting company to conduct a site-specific radius search and examination of reasonably ascertainable Federal, State, and Local regulatory files concerning the site and nearby sites which have been targeted for clean-up or investigation, sites and facilities against which complaints have been filed, or sites on which generators of hazardous waste or regulated substances are located. A copy of the database report is included in Appendix IV. A list of the databases reviewed (including the currency of the records, their definitions and the sources for these records, as well as the search distances) is included in the database report.

Database Survey

The Environmental Data Resources, Inc. (EDR) Report did not identify the subject property on any Federal, State, or Local databases.

The report identified sites, within applicable BOE radii of the subject site, on the following databases:

Database Summary

Database	No. of Sites Listed
Superfund Enterprise Management System (SEMS)	3
RCRA Large Quantity Generators (RCRA-LQG)	5
RCRA Small Quantity Generators (RCRA-SQG)	6
State Hazardous Waste Sites (SHWS)	3
Non-Hazardous Site Inventory (Non-HSI)	12
Solid Waste Facilities/Landfill Sites (SWF/LF)	13
Leaking Underground Storage Tanks (LUST)	1
DRYCLEANERS	23

GEC assessed the listed sites for potential environmental impacts to the subject property using the following criteria: (1) relative distance between the subject property and the regulated site, (2) topographic features and proximity of the subject property to the regulated site; GEC follows the generally accepted premise that shallow groundwater flow direction can be reasonably expected to mimic surface topography, and (3) common inferences about the nature and relevance of the regulatory listing with regard to the subject property.

None of the listed sites are located within a ¼ mile of and upgradient of the subject property, are summarized in the following table. The closest site is the Fastee Foods #68 located approximately 2,023 feet northwest of the subject property at 3768 Log Cabin Drive. The site is listed on the LUST and UST database sites for containing three gasoline tanks (two 8,000-gallon and one 10,000-gallon). A confirmed release at the facility was given a No Further Action (NFA) status on December 2, 2013. Due to the distance from the subject property, topographical features, and facility status, GEC is of the opinion that the facility does not pose an environmental concern to the property.

GEC is of the opinion that the remaining facilities do not pose an environmental concern to the property due to their distances from the subject property, presumed groundwater flow direction, topographic features, and facility status. No visual evidence of recognized environmental conditions was observed at the subject property during GEC's site visit. Liability for such a release, if or when it occurs, should remain with the respective site owners.

Orphan Sites

GEC reviewed the "orphan summary" sites, which were not mapped due to poor or inadequate address information, in the database Report. None of the sites appeared to be located within the ASTM E 1527-13 prescribed search distances, therefore none of the sites listed on the "orphan summary" represent RECs.

Vapor Encroachment

GEC performed a Tier 1 Vapor Encroachment Screening (Tier 1) of the subject property, as part of this ESA. The Tier 1 screening was performed in general accordance with Sections 8.1.3.1 through 8.1.3.9 (which describes the Tier 1 process) of the ASTM E 2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

GEC's methodology for performing this vapor encroachment screening consisted of assessing all the information collected in the Phase I investigation, including information collected in site reconnaissance, interviews, historical documentation and actual or probable chemical usage on the target property or nearby property.

GEC assessed the listed facility for vapor encroachment on the subject property using the following criteria: (1) relative distance between the subject property and the facility, (2) presumed (or known) groundwater flow direction; GEC follows the generally accepted premise that shallow groundwater flow direction can be reasonably expected to mimic surface topography, (3) common inferences about the nature and relevance of the regulatory listing with regard to the subject property, and (4) the nature of the chemicals of concern (petroleum vs. non-petroleum) released or potentially released from the facility.

GEC assessed the listed sites for a potential concern for vapor encroachment to the subject property and found that based on site topography, distances, and site listings and/or status, GEC is of the opinion that vapor encroachment is unlikely to be an issue of concern in connection with existing or planned structures on the subject property.

5.2 Additional Environmental Record Sources

GEC contracted with Environmental Data Resources, Inc. (EDR) to conduct a site-specific radius search and examination of reasonably ascertainable Federal, State, and Local regulatory files concerning the site and nearby sites which have been targeted for clean-up or investigation, sites and facilities against which complaints have been filed, or sites on which generators of hazardous waste or regulated substances are located. The additional environmental record sources (Section 8.2.2 of the ASTM E 1527-13 standard) are included in the "State and Local Records" section of the EDR Report (see page 4 of the EDR Report in Appendix IV). These additional environmental record sources include local Brownfields, local landfill/solid waste disposal sites, local hazardous waste/contaminated sites, local registered storage tanks, local land records for activity and use limitations (AULs), emergency release reports (spills), and contaminated public wells.

5.3 Physical Setting Sources

Physical Setting/Topographic Map

The subject property can be found on the Macon West, Georgia Quadrangle of the U.S.G.S. 7.5-minute series Topographic Map with contour intervals of 10 feet photo-revised in 1985. A copy of the pertinent portions of this topographic map, showing the subject property and the surrounding area, is presented as Figure 2 in Appendix I.

The site is labeled as Riley School and the structure is located on the northern portion of the site.

The site elevation, as shown on the topographic map, ranges between approximately 420 to 440 feet above mean sea level. The down slope of on-site surface drainage features currently appears to be to the south towards a tributary of Rocky Creek. Based on review of the topographic map and observations made during the site reconnaissance, the inferred direction of shallow groundwater flow at the subject site should be to the south towards a tributary of Rocky Creek

Geologic Setting

The subject property is located within the Coastal Plain Physiographic Province of Georgia. Soils in the Coastal Plain are the result of deposition of sediments in a former marine environment. Coastal Plain sedimentary deposits make up about 60 percent of Georgia's surface area, and consist of a southwardly thickening wedge of sediments, which are bordered on the north by the parent rocks of the Piedmont Physiographic Province. The border between these provinces is known as the "Fall-Line." The Coastal Plain sediments range in age from the Cretaceous to the recent, with the oldest exposed along the "Fall-Line" and the youngest along the coast. Typically, the surface soils consist of complexly interbedded sands, silts, and clays of various mixtures. Sandstones, shales, and limestone comprise the characteristic lithology of the Coastal Plain. These formations are usually found at depths greater than fifty feet but can also be found at or near the ground surface. Topography in this region of the Coastal Plain is generally flat to gently rolling.

5.4 Historical Use Information on the Property

The purpose of the historical review of the subject property is to develop a history of the site and the activities that occurred there, in an effort to identify any past uses or activities that may have resulted in recognized environmental conditions in association with the subject property. The following standard historical sources were sought and/or consulted in constructing the history of the subject site:

Aerial Photographs - GEC reviewed readily available aerial photographs of the subject property, to assist in developing the historic usage of the site. The photos were obtained through a commercial database search firm and from Google Earth™. The aerial photographs reviewed for the subject site are included in Appendix III.

Aerial photographs (2015, 2010, 2007, 1993, 1988, 1981, 1972, 1966, 1958, 1955 and 1938) were obtained through a commercial database search firm, Environmental Data Resources, Inc. A current aerial photograph (2017) was obtained off the Internet at the Google Earth™ web page. A copy of the current aerial photograph appears in Appendix I (Maps/Figures as Figure 3).

The aerial photographs reviewed did not indicate environmental concerns to the site. Subject property features and site vicinity features are noted on the reviewed aerial maps are presented in the following table.

Year of Photo	Source	Notes
1938	EDR	The subject property appears to be open and/or agricultural land. Open and/or agricultural and wooded land surround the site in all directions.
1955	EDR	No significant changes from previous noted.
1958	EDR	Buildings appear on the northern portion of the site. Residential structures are developed to the north and east of the site beyond roadways that border the property.
1966	EDR	An additional structure is developed on the site. Wooded land borders the site to the west. Residential development continues to the west and south of the site.
1972	EDR	No significant changes from previous noted.
1981	EDR	A commercial structure is developed to the north of the site.
1988	EDR	No significant changes from previous noted.
1993	EDR	No significant changes from previous noted.
2007	EDR	Additional changes are made to the onsite structures.
2010	EDR	No significant changes from previous noted.
2015	EDR	No significant changes from previous noted.
2017	Google Earth	No significant changes from previous noted.

GEC contacted Environmental Data Resources, Inc. (EDR) to search for Sanborn Fire Insurance Maps, which were devised by insurance adjusters as early as the 1800s to show the use of properties at specified dates for the purpose of determining the risk of fire. The maps also identify businesses and activities, as well as some construction details, for those properties they cover. The Sanborn Maps are helpful in identifying historical environmental concerns that may have otherwise been unrecorded or left no evidence of their existence. Copies of the 1968 and 1960 Sanborn Maps are presented in Appendix III.

The 1960 and 1968 maps show the Joseph Riley School buildings on the northern portion of the site. Greenbriar Road borders the site to the north and Brinwood Drive borders the site to the east. The Sanborn Maps did not reveal any indications of environmental concerns for the subject property or the surrounding area.

City Directories - GEC contracted with a database report firm to search for city directories, which have been published for cities and towns across the U.S. since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Directories are generally divided into three sections; a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business is operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive in major cities, it may be spotty for rural areas and small towns.

The subject property is listed as Riley Joseph B School, Edison Schools, Bibb County Board of Education and Riley Elementary PTO on the 1959 to 2014 directories. Adjoining properties along the Greenbriar Road and Brinwood Drive include various individuals as early as the 1959 city directory.

Examination of the EDR – City Directory Abstract did not reveal any indications of environmental concerns for the subject property or the surrounding area. A copy of the City Directory report is presented in Appendix III.

The Environmental Data Resources, Inc. (EDR) Historical Topographic Map Report, which provided additional U.S.G.S. Topographic Maps are included in Appendix III.

5.5 Historical Use Information on Adjoining Properties

The aerial photographs reviewed did not indicate environmental concerns within the site vicinity. Site vicinity features noted on the reviewed aerial maps are presented in the following table.

Year of Photo	Source	Notes
1938	EDR	The subject property appears to be open and/or agricultural land. Open and/or agricultural and wooded land surround the site in all directions.
1955	EDR	No significant changes from previous noted.
1958	EDR	Buildings appear on the northern portion of the site. Residential structures are developed to the north and east of the site beyond roadways that border the property.
1966	EDR	An additional structure is developed on the site. Wooded land borders the site to the west. Residential development continues to the west and south of the site.
1972	EDR	No significant changes from previous noted.
1981	EDR	A commercial structure is developed to the north of the site.
1988	EDR	No significant changes from previous noted.
1993	EDR	No significant changes from previous noted.
2007	EDR	Additional changes are made to the onsite structures.
2010	EDR	No significant changes from previous noted.
2015	EDR	No significant changes from previous noted.
2017	Google Earth	No significant changes from previous noted.

6.0 SITE RECONNAISSANCE

GEC performed a site reconnaissance of the subject property on March 29, 2018. All comments included in this section refer to the conditions at the time of the site reconnaissance only. Selected photographs taken identified during the site reconnaissance are included in Appendix II.

6.1 Methodology and Limiting Conditions

GEC's methodology for performing the Environmental Site Assessment (ESA) was in general accordance with ASTM E 1527-13. No significant limiting conditions were encountered during the site reconnaissance.

6.2 General Site Setting

The subject site is located at 3522 Greenbriar Road in Macon, Bibb County, Georgia. During the site reconnaissance, GEC observed the subject property to be occupied with the Riley Elementary School.

Historically, the subject property appears to have been developed land since the 1958 aerial. According to the city directory, the site has existed as a school as early as 1959.

6.3 Exterior Observations

During the site reconnaissance, the following items were used as visual indicators of potential on-site contamination sources: (1) surface spills or disposal areas of liquids or solids; (2) surface storage of drums; (3) areas of distressed vegetation, stained soils/pavement, or odors; (4) solid waste and/or fill areas; (5) site drainage features or water bodies (including pits, ponds, or lagoons); (6) waste water; (7) wells and/or septic systems; and (8) general housekeeping and maintenance.

6.3.1 Drums

None observed.

6.3.2 Hazardous Substances & Petroleum Products in Connection with Identified Users

None observed.

6.3.3 Storage Tanks

None observed.

6.3.4 Odors

None observed.

6.3.5 Pools of Liquid

None observed.

6.3.6 Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection With Identified Uses)

None observed.

6.3.7 Unidentified Substance Containers

None observed.

6.3.8 PCBs

Four pole-mounted transformers and one pad-mounted transformer were observed on the property. The transformers appeared to be in good condition with no visible signs of leakage (stained soils or dead vegetation) beneath. They are owned by, and the responsibility of, the local public utility. No other suspected PCB-containing materials were observed during GEC's site reconnaissance.

6.3.9 Pits, Ponds, or Lagoons

None observed.

6.3.10 Stained Soil or Pavement

None observed.

6.3.11 Stressed Vegetation

None observed.

6.3.12 Solid Waste

None observed.

6.3.13 Wastewater

No wastewater was observed discharging into a drain, ditch or stream on or adjacent to the subject property during GEC's site reconnaissance.

6.3.14 Water Supply & Wells

According to various sources, municipal water serves the subject site. Evidence of water wells was not observed on the property.

6.3.15 Sewage Disposal/Septic System

According to various sources, municipal sewer serves the subject site. Evidence of septic systems was not observed on the property.

6.4 Interior Observations

The interiors of the on-site buildings were indicative of a school structure. See section 3.4 for further details.

6.4.1 Heating/Cooling

An HVAC system was observed to serve the subject building.

6.4.2 Stains or Corrosion

No visible signs of significant stains and/or corrosion were observed during GEC's site reconnaissance.

6.4.3 Drains and Sumps

No floor drains other than the interior bathroom drains.

7.0 INTERVIEWS

7.1 Interview with Owner Contact

GEC provided our client a copy of the site assessment checklist. At the time of issuance of the report, a response from the department was not received. GEC does not expect information from the owner to affect the conclusions of this report.

7.2 Interview with Site Manager

No site manager was interviewed during the course of this Phase I ESA.

7.3 Interview with Occupant

The lack of interviews with the current or past occupants is not considered to be a significant data gap, since significant information beyond what was available from other interviews and the public record is not expected.

7.4 Interviews with Local Government Officials

Environmental Health Department

GEC faxed an information questionnaire to the Bibb County Environmental Health Department on March 28, 2018. A response from the department indicated that there are no records of environmental concerns at the subject property. Municipal water and sewer were also noted as serving the property. A copy of the information questionnaire is presented in Appendix V.

Fire Department

GEC faxed an information questionnaire to the Bibb County Fire Department on March 28, 2018. A response from the department indicated that there are no records of environmental concerns at the subject property or within the site vicinity. The department noted that they are unaware of storage tanks currently or formerly on or adjacent to the site. They also indicated that the site is presently an elementary school and the last fire inspection was conducted on January 16, 2018. A copy of the information questionnaire is presented in Appendix V.

Planning & Zoning

GEC reviewed a copy of the Bibb County Zoning Map on March 28, 2018. According to the map, the property is zoned R-1A, Single Family Residential District. A copy of the zoning map is presented in Appendix V.

7.5 Interviews with Others

GEC noted evidence of a natural gas line near the subject property. GEC contacted Atlanta Gas Light to determine additional information about the pipeline. Mr. Paul Teague, Manager with the Southern Company, indicated via email that the pipeline is a 2" MHP steel main at 45 psig and is located along on Greenbriar Road East. A map was also provided showing the location of the pipeline. According to the Guideline for Risk Hazard Assessment of Educational Facility Sites, only natural gas transmission and distribution lines larger than ten inches in diameter with a pressure of 200 psi or more are considered hazards to school sites. Therefore, this natural gas distribution line was not considered a hazard for this assessment.

8.0 HAZARD ASSESSMENT

8.1 Identified Hazards within the Applicable Radius

According to the "Guideline", the hazard assessment identifies present conditions that could impact the subject property. GEC reviewed the U.S.G.S. 7.5-minute Topographic Quadrangle Map (see Figure 2 in Appendix I) of the site and surrounding areas, performed a desktop review of the site vicinity, and conducted a visual reconnaissance of the site and immediate site area for this project. GEC found **one** of the twenty GDOE hazards located within the required search radii of the subject property: a highway (Log Cabin Drive). Log Cabin Drive is located approximately 1,700 feet to the north of the property boundary. The GDOE requires a hazard assessment to be conducted if the Phase I ESA discovers any of the 20 hazards listed in the Guideline (see complete list in Section 1.0) and outlined in the GDOE document within the recommended radii of the proposed site.

None of the other remaining GDOE hazards were noted in the site vicinity during the neighborhood drive-by reconnaissance and review of the topographic map. A hazard identification map is presented in Appendix I as Figure 3.

8.2 Hazard Discussion

While conducting this Phase I ESA on the subject property, GEC followed the GDOE Facilities Services Section document entitled "Guideline for Risk Hazard Assessment of Educational Facility Sites" (the Guideline). The GDOE requires a hazard assessment to be conducted if the Phase I ESA discovers any of the 20 listed in the Guideline (see complete list in Section 2.2 Scope of Work) and outlined in the GDOE document within the recommended radii of the proposed site.

For the purpose of estimating the danger of certain hazards to the subject property, GEC utilized the Area Locations of Hazardous Atmospheres (ALOHA) computer program that is available from the Environmental Protection Agency (EPA). The ALOHA program models hazards such as toxicity, flammability, thermal radiation (heat), and overpressure (explosion blast force). The ALOHA program utilizes input from the user concerning basic atmospheric conditions for the area such as temperature, cloud cover, wind speed, humidity, etc. For the

purposes of this evaluation, GEC utilized average conditions for the area based off historical and yearly atmospheric data provided by the National Weather Service and the National Oceanic and Atmospheric Administration (NOAA).

The subject site consists of the Riley Elementary School located at 3522 Greenbriar Road in Macon, Bibb County, Georgia. A site (vicinity) map is included as an attachment.

In utilizing the ALOHA program, GEC researched the NOAA website for climatic information relative to the site area. Based on this research, GEC used the following average values for input into the ALOHA program: Ambient temperature: 63 degrees Fahrenheit, Wind velocity: 7 mph, Wind direction (prevailing): from the NW measured at a height of 10 meters.

Highways

During GEC's site reconnaissance, GEC observed one highway with ½ mile of the subject site: Log Cabin Drive is located approximately 1,700 feet north of the site. According to the Georgia Department of Transportation (GDOT), Log Cabin Drive had a traffic count of 10,500 vehicles per day during the year 2016. The closest subject building is located approximately 2,100 feet downwind of the highway. Therefore, GEC performed an ALOHA evaluation on Log Cabin Drive.

The modeling was conducted using the average climatic conditions for the site area and judged potentially worst-case scenarios for the potential hazards identified. These hazards included the following: (1) Explosion Chemical Hazard-tanker truck containing Gasoline, (2) Flammable Chemical Hazard-tanker truck containing Gasoline, and (3) Toxic Gas Hazard-tanker truck containing Gasoline. In the modeling, the prevailing wind direction was considered only for the toxic gas hazard, as the risk from the toxic gas hazard is highly dependent on the spread of the gas cloud, which generally follows the wind direction. The modeling performed does not include the evaluation of hazards for all climatic conditions and all chemicals and products potentially being hauled on a tanker truck. This evaluation should in no way be considered to be all inclusive of all potential hazards.

The potential major hazard from Log Cabin Drive would be from a hazardous material spill associated with an accident. The tanker truck size modeled was assumed to be approximately 30,000 gallons. Benzene was evaluated since it is a major component of gasoline and is considered a very volatile ingredient of gasoline. Several different scenarios were run utilizing the ALOHA software and are discussed below.

The following are the findings of the ALOHA evaluation for releases on Log Cabin Drive closest to the subject site and at a direct upwind position from the subject site:

Toxic Cloud Hazard from Evaporating Puddle -Tanker Truck Containing Gasoline

The highest concentration threat (red zone) toxic cloud from an evaporating puddle with a diameter of 100 feet and a volume of 1,000 gallons from a tanker truck located on Log Cabin Drive near the subject property was found to extend 34 yards (102 feet) from the highway. The "orange" threat zone extends to a distance of 110 yards (330 feet). The lowest threat zone extends to a distance of 560 yards (1,680 feet). Each of the threat zones extend southeast of the highway while the closest site building is located approximately 2,100 feet southeast of the highway. Based on the ALOHA evaluation, the threat of a toxic cloud hazard effecting the school buildings located on the property is unlikely.

Flammable Vapor Cloud from Evaporating Puddle - Tanker Truck Containing Gasoline

The flammable cloud from an evaporating puddle with a diameter of 100 feet and a volume of 1,000 gallons from a tanker truck located on Log Cabin Drive near the subject property was found to extend approximately 83 yards (249 feet) southeast from the highway. The closest building on the property is located approximately 2,100 feet southeast of the highway. Based on the ALOHA analysis, it appears that the flammable vapor cloud is unlikely to have an effect on the school buildings located on the property.

Overpressure (Blast Force) from Evaporating Puddle - Tanker Truck Containing Gasoline

The ALOHA program indicates that no part of the cloud is above the LEL at any time; therefore, there is no threat of an explosion from an evaporating puddle to the site.

Flammable Chemical Hazard -Tanker Truck Containing Gasoline

The ALOHA program indicates that the threat zone for the thermal radiation from a pool of fire that continuously leaked from a 30,000-gallon tanker with gasoline would be the following:

- Potentially lethal within 60 seconds at a distance of 42 yards (126 feet).
- Second degree burns within 60 seconds at a distance of 68 yards (174 feet).
- Pain within 60 seconds at a distance of 89 yards (267 feet).

The closest building is located approximately 2,100 feet southeast of the hypothetical tanker leak on the highway. Based on the ALOHA evaluation, thermal radiation from a spill on the highway is unlikely to impact the school site due to the distance of impact.

Thermal Radiation from Fireball -Tanker Truck Containing Gasoline

The ALOHA program indicates that the threat zone for the thermal radiation from an explosion of a 30,000-gallon tanker with gasoline would be the following:

- Potentially lethal within 60 seconds at a distance of approximately 607 yards (1,821 feet).
- Second degree burns within 60 seconds at a distance of approximately 859 yards (2,577 feet).
- Pain within 60 seconds at a distance of approximately 1,342 yards (4,026 feet).

Since the property is located approximately 2,100 feet southeast off the highway, this hazard could have an effect on the school buildings located on the property.

While the possibility exists for a tanker truck to overturn on the highway upwind the subject property, the probability of such an accident occurring is highly dependent on several factors including weather conditions and the human element. These make it difficult, if not impossible, to predict or even to assume probabilities beyond mere conjecture.

Recommended Mitigation Measures

Due to the proximity of the nearby highway to the school site, mitigation measures should be considered. Mitigation measures help to alleviate concerns from a potential identified hazard; however, they are not “guaranteed” to prevent the hazard from affecting the school or its’ students, workers and visitors. The following are recommendations and approved methods of mitigation for potential hazards, as provided for in the Georgia Department of Education “Guideline for Risk Hazard Assessment of Educational Facility Sites”, that we feel would be beneficial to the project.

- Emergency preparedness plan - the potential hazards identified in our study should be incorporated into the school’s Comprehensive Emergency Preparedness Plan.
- Evacuation- Evacuation routes and procedures for the identified hazards should be included in the plan.

As stated, the implementation of these hazard mitigation methods, although not guaranteed to preclude the noted hazards from affecting the property, will serve as approved mitigation systems for deterring the hazards at the site.

Copies of the ALOHA program printouts are included in the Appendix VIII.

9.0 FINDINGS

GEC has completed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527-13 on the subject property.

Data gaps experienced during the course of this Phase I ESA include the following:

- Intervals between aerial photographs longer than five years. Intervals between topographic maps longer than five years.
- The lack of complete title history on the property.
- The lack of an environmental lien or activity and use limitations review for the property.
- The lack of interview responses.

GEC has completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 on the Riley Elementary School. The subject property is located at 3522 Greenbriar Road in Macon, Bibb County, Georgia. Based on the findings presented in this report, GEC found no obvious environmental concerns or risks associated with the subject property.

GEC found one of the 20 GDOE hazards located within the required search radii of the subject property: a highway (Log Cabin Drive). Refer to Section 8.0 for further details.

10.0 OPINION

Based on the information reviewed during the course of the Phase I ESA, the following is noted regarding the items listed in the Findings section, above:

- None of the above data gaps are deemed to be significant, based on the availability of information from other sources, as well as the lack of development in the previous years.

The site reconnaissance and research conducted during the course of this project revealed no evidence of a recognized environmental conditions that would indicate the presence or likely presence of hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environmental; or (3) under conditions that pose a material threat of a future release to the environment.

11.0 CONCLUSIONS

GEC has completed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527-13 on the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

Interviews and review of reasonably ascertainable records by GEC during the completion of the Phase I ESA did not indicate past usage or conditions which would likely result in significant environmental concerns. No recognized environmental conditions (RECs), as that term is defined in the ASTM standard, were identified on the subject property.

During GEC's site reconnaissance on March 29, 2018, GEC observed the site to consist of Riley Elementary School. The school buildings, playground, and parking lots are located on the northern portion of the site. Wooded areas were observed along the western and southern property boundaries with the remainder of the site consisting of open land. GEC observed no visual signs of hazardous substance or petroleum contamination (stressed vegetation and/or significant stains or odors) on the subject property. In addition, no odors, and/or pits/ponds, or lagoons associated with waste treatment were observed on the site.

Conditions affecting future use of the school are the potential existence of lead-based paint (LBP) and asbestos containing materials (ACMs). The potential existence of LBP and ACMs must be considered in accordance with all state and federal regulations for any renovation or demolition project.

GEC found **one** of the 20 GDOE hazards located within the required search radii of the subject property: a highway (Log Cabin Drive). Refer to the Hazard Assessment portion of this assessment (Section 8.0) for further details.

Based on the research and conclusions of this assessment, no additional environmental assessment is deemed appropriate at this time. It is our opinion that the site is suitable for the proposed a proposed addition to the school provided the recommendations contained herein are followed.

Since no assessment can absolutely deny the existence of hazardous materials, especially surficial environmental assessments with limited or no subsurface sampling, existing hazardous materials can escape detection using the customary methods. The conclusions of the environmental assessment are based on conditions as observed on our site visits and historical information about the site. Future changes in environmental conditions and site characteristics may occur with the passage of time, in which case, the conclusions of this report may have to be reevaluated.

12.0 DEVIATIONS

GEC has completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13, with no deletions or deviations.

13.0 ADDITIONAL SERVICES

The User requested no additional services, outside the ASTM 1527-13 prescribed scope, as part of this Phase I ESA.

15.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Geotechnical & Environmental Consultants, Inc. (GEC) has completed a Phase I Environmental Site Assessment of the above referenced site in general accordance with the most current ASTM standard (ASTM E 1527-2013, Standard Practice for Environmental Site Assessments). The conclusions presented in this report are our professional opinions based on our findings obtained in general accordance with customary practices, principles, and methodologies utilized in the fields of environmental science and engineering. Other than this, no warranty is implied or intended.

GEC declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Certified Sanborn® Map Report

03/29/18

Site Name:

Riley Elementary School
3522 Greenbriar Road
Macon, GA 31204
EDR Inquiry # 5239886.3

Client Name:

Geotechnical & Env'tl. Cons.
514 Hillcrest Industrial Boulevard
Macon, GA 31204
Contact: Colleen Clark

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geotechnical & Env'tl. Cons. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: F085-465D-9E99

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Geotechnical & Env'tl. Cons. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1900 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Historical Topo Map Report

03/29/18

Site Name:

Riley Elementary School
3522 Greenbriar Road
Macon, GA 31204
EDR Inquiry # 5239886.4

Client Name:

Geotechnical & Env'tl. Cons.
514 Hillcrest Industrial Boulevard
Macon, GA 31204
Contact: Colleen Clark

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Geotechnical & Env'tl. Cons. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA
Project: 150587.241

Coordinates:

Latitude: 32.833108 32° 49' 59" North
Longitude: -83.690429 -83° 41' 26" West
UTM Zone: Zone 17 North
UTM X Meters: 248160.80
UTM Y Meters: 3635992.84
Elevation: 430.00' above sea level

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 SEMS sites within approximately 3 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 5 RCRA-LQG sites within approximately 3 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 6 RCRA-SQG sites within approximately 3 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Natural Resources' Hazardous Site Inventory.

A review of the SHWS list, as provided by EDR, and dated 07/01/2017 has revealed that there are 3

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Natural Resources' Operating Solid Waste Facilities' list.

A review of the SWF/LF list, as provided by EDR, and dated 10/11/2017 has revealed that there are 13 SWF/LF sites within approximately 3 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

DRYCLEANERS: A list of drycleaners in the state. The listing includes drycleaner facilities, that use perchloroethylene, that responded to the Notification of Compliance Status forms. It also includes those businesses that are pick-up stores only and do not conduct dry cleaning on site.

A review of the DRYCLEANERS list, as provided by EDR, and dated 12/22/2014 has revealed that there are 23 DRYCLEANERS sites within approximately 3 miles of the target property.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 140

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 9

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 11

RS Released/Threats to Health Env:

This site has a known release of Benzo(a)pyrene in groundwater at levels exceeding the reportable quantity. No human exposure via drinking water is suspected from this release. The nearest drinking water well is between 0.5 and 1 miles from the area affected by the release. This site has a known release of Benzo(a)pyrene in soil at levels exceeding the reportable quantity. This site has limited access. The nearest resident individual is less than 300 feet from the area affected by the release.

Status of Cleanup Activities:

Cleanup activities are being conducted for source materials, soil, and groundwater.

GA EPD Dir Determination Re Correction Action:

The Director has determined that this site requires corrective action.

all facilities and sites regulated or monitored by the EPA and a single system for the reporting of all environmental data.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	186
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	12
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	35
Waste code:	D009
Waste name:	MERCURY

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	94
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	2
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	34
Waste code:	D009
Waste name:	MERCURY
Amount (Lbs):	1
Waste code:	D010
Waste name:	SELENIUM
Amount (Lbs):	34
Waste code:	P001
Waste name:	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs):	20
Waste code:	P075
Waste name:	NICOTINE, & SALTS
Amount (Lbs):	20
Waste code:	U002
Waste name:	ACETONE (l)

Waste code: D002
Waste name: CORROSIVE WASTE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1072

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
 Amount (Lbs): 1903

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
 Amount (Lbs): 907

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: LDR - General
Date violation determined: 07/10/2012
Date achieved compliance: 08/03/2012
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 07/16/2012
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Evaluation Action Summary:

Evaluation date: 07/10/2012
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: LDR - General
Date achieved compliance: 08/03/2012
Evaluation lead agency: State

FINDS:

Registry ID: 110012577149

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018

	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (404) 562-8651
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (404) 562-8651
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (404) 562-8651
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 03/28/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/09/2018
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (404) 562-8651

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

SHWS: Hazardous Site Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

NON HSI: Non-Hazardous Site Inventory

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 02/14/2018	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

North Map:	6046664 MACON NW, GA
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

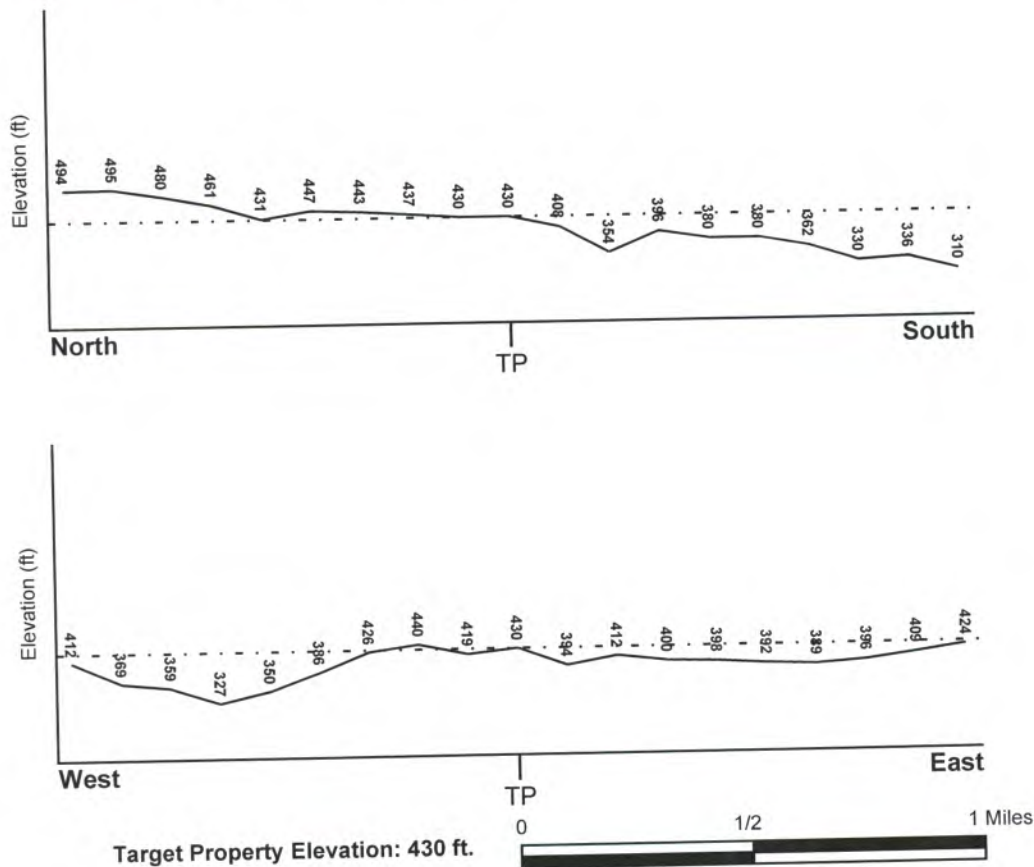

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Additional Panels in search area:</u> 13021C0127F 13021C0131F 13021C0133F	<u>FEMA Source Type</u> FEMA FIRM Flood data FEMA FIRM Flood data FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> MACON WEST	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Vaucluse

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6 Min: 4.5
2	7 inches	22 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 14 Min: 4	Max: 5.5 Min: 3.6

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

March 26, 2018

Via Email: David.Andrews@bcsdk12.net

Mr. David Andrews
Macon-Bibb County Board of Education
484 Mulberry Street
Macon, GA. 31201

SUBJECT: Proposal for Georgia Department of Education (GDOE)
Phase I Environmental Site Assessment (ESA) & Hazard Assessment
Riley Elementary School
3522 Greenbriar Road
Macon, Bibb County, Georgia
GEC Proposal #ME-18-9282

Dear Mr. Andrews:

Geotechnical & Environmental Consultants, Inc. (GEC) is pleased to submit this proposal to conduct a Phase I Environmental Site Assessment (ESA) on the Riley Elementary School property located at 3522 Greenbriar Road in Macon, Georgia. The Phase I ESA ASTM Standard will be performed in accordance with the ASTM-E 1527-2013 (Standard Practice for Environmental Site Assessments; Phase I Environmental Site Assessment Process) {the Practice}.

GEC proposes that the Hazard Assessment required by the Georgia Department of Education be performed in conjunction with the Phase I ESA. This proposal presents further information about the Environmental Assessment, the Hazard Assessment, and our proposed pricing. The following sections summarize our anticipated scope of work, schedule, and costs. If other environmental concerns or issues are noted during any stage of our service provision, we will provide notice and/or professional opinion to you on that concern also.

SCOPE OF WORK

The Phase I ESA will be performed in conjunction with the Hazard Assessment. The following sections summarize our anticipated scope of work, schedule, and estimated costs.”

HAZARD ASSESSMENT

In the case of school site selection, the Phase I ESA process is more involved than the ASTM 1527-2013 Standard. The Georgia Department of Education Facilities Services Unit guidance documents, *Guideline for Risk Hazard Assessment of Educational Facility Sites*, requires the assessment search to be done up to a three-mile radius (the ASTM format's greatest radius is one mile) for some of the additional items considered hazards and listed in the cited guideline.

Georgia Department of Education Facilities Services Unit Criteria for Selection

According to the Georgia Department of Education Facilities Section, *Guideline for Risk Hazard Assessment of Educational Facility Sites*, a Phase I Environmental Site Assessment will be required for each school site. If any one or more of the following hazards are located on or near (up to three mile radius) a proposed school site, a Hazard Assessment will be required in addition to the Phase I ESA. The Hazards include:

1. Electrical transmission lines rated at 115KV or higher;
2. Oil or petroleum products transmission lines and storage facilities;
3. Hazardous chemical pipelines;
4. Natural gas transmission and distribution lines larger than ten inches in diameter with a pressure of 200 psi or more;
5. Propane storage facilities;
6. Railroads;
7. Major highways;
8. Airport approach or departure paths;
9. Industrial/manufacturing facilities;
 - a. Using or storing hazardous substances as defined under Title 40 CFR 262;
 - b. Emitting hazardous air pollutants as defined under the "Clean Air Act: and/or
 - c. 1990 "Clean Air Act Amendment" – Risk Management Plan Sec. 11(r)
10. Lakes, rivers, dams, reservoirs, or other bodies of water;
11. Potential flooding because the property is located within the 100 year flood plain or dam breach zone;
12. Nuclear waste storage facilities;
13. Munitions or explosives storage or manufacturing;
14. Water towers adjacent to the site;
15. Active or abandoned mines or quarries;
16. Remedial hazardous waste sites;
17. Landfills and dumps;
18. Treatment plants;
19. Power plants;
20. Military installations.

The *Guideline* also references the most common potential hazards and defines relative distances for identifying the noted hazards. Water bodies adjacent to a site and/or upstream of a site are a concern. Power lines should be greater than 300 feet away from the site. Fuel pipelines, chemical pipelines, large fuel storage facilities, industrial facilities, railroads, dry cleaners, and power plants

within one mile of a site; gas stations, highways, and landfills within a ½-mile; and airports and nuclear facilities within three miles need to be evaluated.

The GDOE requires a hazard assessment to be conducted following the discovery of any of the GDOE hazards within the required search radius of the proposed site. This information will be included in the Phase I ESA scope of work.

To conduct the Hazard Assessment GEC will contact those parties knowledgeable of or contributing to the GDOE hazards, if possible, (typically power companies, pipeline companies, railroad companies, etc.) to gather additional information regarding the subject hazards. The findings for each hazard evaluated will be discussed in the report and will form a basis for assessing the potential risk to the school site.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

GEC generally uses a two-phased approach to performing environmental assessments. The first phase involves a review of public records, interviews, and a reconnaissance of the site. If either of these tasks indicates that hazardous substances or petroleum products may have adversely impacted the site, appropriate environmental sampling and/or further assessment would be recommended in our Phase I ESA report. Generally, such findings would be discussed with the Phase I ESA user before submittal of the report so that decisions concerning further assessment or sampling may be made early in the assessment process. The Phase II ESA consists of sampling, data evaluation, and other work, which might be required or recommended beyond the Phase I ESA. The following paragraphs discuss the general Phase I ESA scope of work and pricing.

The scope of work for any ASTM Phase I ESA is to identify "recognized environmental conditions" to the extent feasible by the processes outlined in Practice E 1527 and with respect to the limited range of contaminants defined within the scope of CERCLA and petroleum products.

Practice E 1527 defines "recognized environmental conditions" (RECs) as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action, if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

The scope of Practice E 1527 does not include any testing or sampling of materials (e.g., soil, water, air, or building materials), and furthermore, does not typically address ASTM non-scope items such as asbestos containing materials (ACMs), radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural & historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or for indoor air quality issues such as, biological agents, or mold.

Review of Public Records

This task is intended to identify evidence, readily available in the public records, of past or present activities on or in the immediate vicinity of the site that may have resulted in contamination or deposition of hazardous waste or petroleum products.

While conducting this task, GEC will:

- Review readily ascertainable public records, such as EPA and State databases, regarding the past, present and pending regulation, enforcement actions, and/or investigation, at the site and within its immediate vicinity.
- GEC will review readily available property record cards, deeds, and title records for the subject property to meet the requirements of the Practice. If you provide GEC a documented complete chain of title, search for environmental liens, and activity use limitations (AULs) in accordance with the ASTM E 1527-13 Standard Practice, GEC will review it to meet the information requirement.
- Interview readily available, appropriate local officials (such as the fire department, health department, and local planning/zoning agency) to determine if there is local knowledge of hazardous material or petroleum product impacts adjacent to or on the site.
- Review readily available aerial photographs for indications of past land use and potential environmental impacts to the site.
- Review available topographic maps to determine the expected surface water and the shallow groundwater flow directions.
- Review available Sanborn maps and/or city directories to help ascertain past usage of the site area.

Site Reconnaissance

The site reconnaissance is intended to identify visual evidence of hazardous substances or petroleum products on or adjacent to the site. While conducting the site reconnaissance, GEC will observe readily accessible areas of the buildings and the grounds lying within the boundaries of the site for the following:

- Visual evidence of past or current activities, which may have involved hazardous substances or petroleum products (i.e., stained soil, distressed vegetation, stained slabs or foundations, abandoned drums or containers, fill areas, vent pipes, etc.)
- Visual evidence of Underground Storage Tanks (USTs) and Aboveground Storage Tanks (ASTs)

GEC will also look for recognized environmental conditions, which would likely be the subject of enforcement action, if brought to the attention of regulators. Pertinent observations, such as those listed above, will be photographed for inclusion in the Phase I ESA report.

GEC

CLIENT (USER) RESPONSIBILITIES

As previously stated, the purpose of conducting due diligence with all appropriate inquiry is to qualify for one of three innocent landowner limitations to CERCLA liability. In order to accomplish this purpose, the ASTM Standard E 1527-13 at *Section 6.0 User's Responsibilities* lists several tasks that must be performed by the User, or for which the User is responsible. A questionnaire will be provided to the Client by GEC that must be filled out and returned in order to meet the User Responsibility information requirements under the Practice and successfully complete the Phase I ESA report. GEC will not provide a search of title and judicial records as required under User's Responsibilities by Section 6.2 of the Standard, for environmental liens or activity and use limitations (AULs) currently recorded against or relating to the property unless otherwise directed by the User/Client (additional charges may apply).

- Perform all tasks/provide all information as directed by the ASTM E 1527-13 Section 6.0 and/or complete the User Questionnaire provided by GEC and return to GEC.
- Provide any personal pertinent environmental information on the property and/or a property contact and/or other knowledgeable person, as available, to be interviewed with respect to past history/operations on the subject site.
- Provide available building/site plans, records, any previous environmental studies, and access during all activities.
- Coordinate with environmental specialist and provide scheduled access to all areas.
- Allow on-site photographic documentation for report verification.

As pertinent, these Client Responsibilities apply to all the provided service scopes of work.

REPORT PREPARATION

Upon completing our review of the information obtained during the various scopes of work, GEC will provide a verbal report of our findings. Assuming that no further work is recommended or authorized, we will summarize the results of the pertinent scope of work activities in a final report, after conducting the site work and any other research necessary. GEC will issue **the final report to the Client electronically**. Any hard copies of the report requested by the Client after issuance of the final report will be made available at a cost of each. GEC anticipates that the final report will be issued within 30 days of formal authorization to proceed with the work. GEC's timely receipt of authorization to proceed with this site is critical to a successful and timely completion of this report. If we have any difficulties in this regard, we will advise you immediately.

COST

GEC proposes to provide the Phase I ESA services described herein for the lump sum amount of

GEC

If additional work is recommended, we will contact you to discuss the recommendations and receive authorization before proceeding.

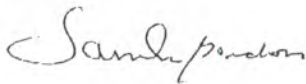

CLOSURE

As formal authorization to proceed with this project, please complete the Proposal Acceptance Form on the next page and return it to our office.

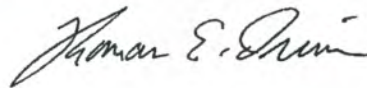

GEC sincerely appreciates the opportunity to work with you on this project. Please feel free to call if you have any questions or need additional information concerning this proposal.

Sincerely,

GEOTECHNICAL & ENVIRONMENTAL CONSULTANTS, INC.

GEC

Terms and Conditions

TERMS AND CONDITIONS: Services performed by GEOTECHNICAL & ENVIRONMENTAL CONSULTANTS, INC. ("GEC") under this AGREEMENT are expected by CLIENT to be conducted in a manner consistent with the level of care and skill ordinarily exercised by and consistent with the standards of competent consultants practicing under similar conditions in the locality of the project. Under no circumstance is any warranty, expressed or implied, made in connection with providing consulting services.

SITE ACCESS AND SITE CONDITIONS: CLIENT will grant or obtain access to the site for all equipment and personnel necessary for GEC to perform the work set forth in the AGREEMENT. CLIENT will notify any and all possessors of the project site that CLIENT has granted GEC access to the site. GEC will take reasonable precautions to minimize damage to the site, but it is understood by CLIENT that, in the normal course of work, some damage may occur and the correction of such damage is not part of this AGREEMENT unless so specified under Special Conditions.

CLIENT is responsible for accurately delineating the locations of all subterranean structures and utilities. GEC will take reasonable precautions to avoid known subterranean structures, and CLIENT waives any claim against GEC from damage done to subterranean structures and utilities not identified or accurately located.

CLIENT represents that CLIENT has made a reasonable effort to evaluate if hazardous materials are on or near the project site, and that CLIENT has informed GEC of CLIENT'S findings relative to the possible presence of such materials. Hazardous materials may exist at a site where there is no reason to believe they could or should be present. GEC and CLIENT agree that the discovery of unanticipated hazardous materials constitutes changed conditions mandating a renegotiation of the scope and terms and conditions of work or termination of services.

SAMPLE DISPOSAL: GEC will dispose of all remaining soil and rock samples thirty (30) days after submission of the report covering those samples. Further storage or transfer of samples can be made upon CLIENT'S prior written request. CLIENT will responsible for ultimate disposal of any samples secured by GEC which are found to be contaminated.

MONITORING: If GEC is retained by CLIENT to provide a site representative for the purpose of monitoring specific portions of construction work or other field activities as set forth in the Scope of Services, GEC will report observations and professional opinions to CLIENT. No action of GEC or their site representative can be construed as altering any AGREEMENT between CLIENT and others. GEC will report to CLIENT any observed geotechnically related work which, in GEC'S professional opinion, does not conform with plans and specifications. GEC has no right to reject or stop work of any agent of the CLIENT. Such rights are reserved solely for CLIENT. Furthermore, GEC'S presence on site does not in any way guarantee the completion of quality of the performance of the work of any party retained by CLIENT to provide field or construction-related services.

GEC will not be responsible for and will not have control or charge of specific means, methods, techniques, sequences or procedures of construction or other field activities selected by any agent or agreement of CLIENT, or safety precautions and programs incident thereto.

BILLINGS/PAYMENTS: The total fee, except stated lump sum, shall be understood to be an estimate, based upon Scope of Services, and shall not be exceeded without approval of the CLIENT. Invoices will be submitted monthly for services and reimbursable expenses and are due when rendered. Invoices shall be considered PAST DUE if not paid within twenty (20) days after the invoice date and GEC may, without waiving any claim or right against CLIENT, and without liability whatsoever to the CLIENT, terminate the performance of the service. A service charge will be charged at 1.5% (or the then applicable legal rate) per month on the unpaid balance. Attorneys fees of fifteen percent 15% and other costs incurred in collecting past due amounts shall be paid by CLIENT. If CLIENT objects to all or any portion of any invoice, CLIENT will so notify GEC in writing within fourteen (14) calendar days of the invoice date, identify the cause of disagreement, and pay when due that portion of the invoice not in dispute. The parties will immediately make every effort to settle the disputed portion of the invoice. In the absence of written notification as described above, the invoice shall be deemed correct and the balance as stated will paid within twenty (20) days.

The CLIENT'S obligation to pay for the services contracted for is in no way dependent upon the CLIENT'S ability to obtain financing, payment from third parties, approval of governmental or regulatory agencies, or upon the CLIENT'S successful completion of the project.

RISK ALLOCATION: In recognition of the relative risks, rewards and benefits of the project to both the CLIENT and GEC, the risks have been allocated such that CLIENT agrees, to the fullest extent permitted by law, to limit the liability of GEC and its sub-consultants to CLIENT and to all construction contractors and subcontractors on the project and any third parties from any and all claims, losses, costs, damages of any nature whatsoever, or claims and/or expenses from any cause or causes, including attorneys' fees and costs and expert witness fees and costs, so that the total aggregate liability of GEC and its subconsultants to all those named shall not exceed the lesser of \$50,000.00 or GEC'S total fee for services rendered on this project. It is intended that his limitation apply to any and all liability or cause of action, however alleged or arising (including, but not limited to, negligence, errors, omissions, strict liability, breach of contract, breach of warranty, or otherwise), unless otherwise prohibited by law. CLIENT and GEC agree that since any such injury would be difficult or impossible to estimate, CLIENT and GEC intend this limitation of damages to be liquidated damages and not as a penalty, and that it is a reasonable estimate of any such probable loss.

INSURANCE: GEC shall maintain at its own expense the following insurance subject to normal industry exclusions: (i) Workmen's Compensation insurance for statutory obligations imposed by Workmen's Compensation or occupational disease laws; (ii) Employer's Liability Insurance with a limit of \$100,000.00 per accident (iii) Comprehensive Automobile Liability Insurance with limits of \$1,000,000.00; (iv) General Liability Insurance with limits of \$1,000,000.00. Certificates can be issued upon request identifying details and limits of coverage.

Revision Date: 1/20/2017

TERMINATION OF SERVICES: This Agreement may be terminated upon ten (10) days written notice by either party should the other fail to perform his obligations hereunder. In the event of termination, the CLIENT shall pay for all services and reimbursable expenses rendered to the date of termination.

OWNERSHIP DOCUMENTS: All documents produced by GEC under this Agreement shall remain the property of GEC and may not be used by this CLIENT for any other endeavor without the prior written consent of GEC.

ASSIGNMENT OF RIGHTS: The rights of each party under this Agreement are personal to that party and may not be assigned or transferred to any other person, firm, corporation, or other entity without the prior, express, and written consent of the other party.

ENTIRE AGREEMENT: This Agreement shall constitute the entire Agreement between the parties and any prior understanding or representation of any kind preceding the date of this Agreement shall not be binding upon either party except to the extent incorporated in this Agreement.

MODIFICATION OF AGREEMENT: Any modification of this Agreement or additional obligation assumed by either party in connection with this Agreement shall be binding only if placed in writing and signed by each party or an authorized representative of each party.

NO WAIVER: The failure of either party to this Agreement to insist upon the performance of any of the terms and conditions of this Agreement, or the waiver of any breach of any of the terms and conditions of this Agreement, shall not be construed as subsequently waiving any such terms and conditions, but the same shall continue and remain in full force and effect as if no such forbearance or waiver had occurred.

EFFECT OF PARTIAL INVALIDITY: The invalidity of any portion of this Agreement will not affect the validity of any other provision. If any provision of this Agreement is held to be invalid, the parties agree that the remaining provisions shall be deemed to be in full force and effect as if they had been executed by both parties subsequent to the expungement of the invalid provision.

EXCUSABLE DELAY: Neither party to this Agreement shall be liable to the other for any loss, cost, or damages, arising out of, or resulting from, any failure to perform in accordance with the terms of this agreement where the causes of such failure shall include, but not be limited to, acts of God, strikes, lockouts, or other industrial disturbances, wars, whether declared or undeclared, blockades, insurrections, riots, governmental action, explosions, fire, floods, or any other cause not within the reasonable control of either party.

NOTICES: Any notice provided for or concerning this Agreement shall be in writing and be deemed sufficiently given when sent by certified or registered mail to the respective address of each party as set forth at the beginning of this Agreement.

GOVERNING LAW, VENUE, and FORUM: All disputes, issues, claims, demands, causes of action, etc., including the construction, validity, and interpretation of this Agreement, shall be governed by and construed in accordance with the domestic laws of the State of Georgia, without giving effect to any choice of law or conflict of law provision (whether of the State of Georgia or any other jurisdiction) that would cause the application of the laws of any other jurisdiction other than the State of Georgia. Client further agrees that the venue for any dispute, issue, claim, demand, cause of action, etc. arising from or related to this Agreement shall be brought in Bibb County, Georgia.

COUNTERPARTS: This agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all of which together shall constitute the same instrument.

**APPENDIX VII:
Qualifications of Personnel**

Thomas E. Driver, P.E.
President/Senior Engineer

Professional Memberships

- American Society of Civil Engineers
- National Society of Professional Engineers
- Georgia Society of Professional Engineers
- American Concrete Institute
- Society of American Military Engineers
- Association of General Contractors

Education

- Bachelor of Civil Engineering, Auburn University, 1983

Experience

Mr. Driver has over 35 years of experience in the fields of environmental and geotechnical engineering and construction quality control and assurance testing. Mr. Driver is the founder and President of Geotechnical & Environmental Consultants, Inc. and is responsible for the overall operation of the firm. In addition, Mr. Driver also assumes project duties and acts as Senior Engineer on numerous projects.

Environmental Experience

- Senior Engineer responsible for over 1,000 Phase I/Phase II Environmental Site Assessments in Georgia.
- Project or Senior Engineer responsible for closure testing on over 100 UST removal projects throughout the southeast.
- Project or Senior Engineer responsible for preparation and implementation of Corrective Action Plans on over 50 confirmed UST contamination sites throughout Georgia and Alabama.
- Senior Engineer for design of SPCC and SWPPP plans throughout Georgia.

Geotechnical & Construction Related Experience

- Experienced in geotechnical evaluations for both shallow and deep foundation systems and site development throughout the southeast.
- Experienced in all phases of construction quality assurance and quality control testing for projects ranging from small wood framed structures to multi-story buildings and large industrial facilities throughout the southeast.
- Experienced in all phases of NPDES stormwater sampling and testing for construction sites.

Professional Registrations

- Alabama #16513
- Florida #67040
- Georgia #17394
- Kentucky #25290
- North Carolina #19125
- South Carolina #26429
- Tennessee #103642

Continuing Education

- HAZWOPER Training
- Inspecting Buildings for Asbestos Containing Materials
- Mold Assessment & Remediation in Buildings
- Landfill Design Short Course
- Leaking Underground Storage Tank Workshop
- Pile and Pier Analysis, Design and Installation
- Real Estate Transaction Environmental Evaluation Training
- SPCC Outreach Program Seminar
- NPDES Construction Permitting Qualified Personnel Training
- Site Analysis for On-Site Sewage Disposal
- Design of Roller Compacted Concrete Dams
- In-Situ Soil Improvement using Geopier Foundations
- Level 1B Certified Inspector for Georgia NPDES General Permit for Construction Activities

GEC

Transportation Experience

- Senior Engineer for numerous Geotechnical BFI and Soil Surveys on DOT projects in Georgia.
- Senior Engineer for NPDES inspections, stormwater sampling and reporting, and rainfall reporting for numerous DOT projects in middle Georgia area.
- Senior Engineer over concrete testing activities on DOT projects in Middle Georgia area.

Solid Waste Experience

- CQA Engineer of record for numerous Subtitle D municipal solid waste landfill projects.
- Senior Engineer for over 20 Hydrogeological Site Assessments for Solid Waste Facilities in Georgia.
- Senior Engineer for design and implementation for over 20 Groundwater and/or Methane Monitoring plans in Georgia.
- CQA Engineer of record for numerous Landfill Closure projects in Georgia.
- Senior Engineer responsible for several groundwater and methane remediation plans for solid waste landfill facilities.

Tameka Gordon
Office Manager/Senior Environmental Specialist

Education

- Bachelors of Science in Business Management & Information Technology, Middle Georgia State University, 2016
- Associate of Science in Business Administration, Macon State College, 2007

Continuing Education

- Environmental Data Resources, Inc. Due Diligence at Dawn Workshop, Atlanta, 2005, 2010
- 40-Hour Hazardous Waste Site Training, Certification 2008
- 8-Hour Hazardous Waste Site Training, Updates (Yearly)
- Phase I Environmental Site Assessments, Certification 2009
- HUD – Environmental Review Procedures for Responsible Entities Training, 2010
- Environmental Due Diligence-Principals and Practice, Certificate 2010
- Vapor Encroachment Screening on Property Involved in Real Estate Transactions, 2010
- Hazardous Waste Management: The Complete Course, 2012

Experience

Tameka has 19 years of experience in general business, research, and writing techniques. She has worked directly in the environmental field, providing project management and environmental consulting services. Her environmental field experience has included Phase I environmental site assessments, Georgia Department of Community Affairs (DCA) and Housing and Urban Development guided environmental assessments, and field sampling. She has performed a number of Georgia Board of Education school site assessments and hazard assessments utilizing the ALOHA (Areal Locations of Hazardous Atmospheres) computer program designed especially for the use by people responding to chemical releases, as well as for emergency planning and training. Tameka has performed numerous Board of Regent's GEPA (Georgia Environmental Policy Act) / NEPA (National Environmental Policy Act) site assessments for University and College projects in surrounding counties. She is a member and has completed various training programs through the Society for Human Resource Management (SHRM). Tameka is also a member of the Women in Affordable Housing Network, Career Women's Network, and ASTM International. She is a 2008 graduate and past board member for Leadership Macon. She currently serves on the Central Georgia American Heart Association Go Red for Women Executive Leadership Team and the Board of Trustees for the United Way of Central Georgia and the Career Women's Network.

Professional Memberships

- Leadership Macon
- Career Women's Network
- Women in Affordable Housing Network
- Middle GA Chapter of Society for Human Resource Management (SHRM)
- ASTM International

GEC

**APPENDIX VIII:
ALOHA Documentation**

Highway - Log Cabin

GEC

Text Summary

ALOHA® 5.4.7

SITE DATA:

Location: MACON, GEORGIA
Building Air Exchanges Per Hour: 0.57 (unsheltered single storied)
Time: April 6, 2018 0936 hours EDT (using computer's clock)

CHEMICAL DATA:

Chemical Name: BENZENE
CAS Number: 71-43-2 Molecular Weight: 78.11 g/mol
AEGL-1 (60 min): 52 ppm AEGL-2 (60 min): 800 ppm AEGL-3 (60 min): 4000 ppm
IDLH: 500 ppm LEL: 12000 ppm UEL: 80000 ppm
Carcinogenic risk - see CAMEO Chemicals
Ambient Boiling Point: 175.5° F
Vapor Pressure at Ambient Temperature: 0.086 atm
Ambient Saturation Concentration: 87,129 ppm or 8.71%

ATMOSPHERIC DATA: (MANUAL INPUT OF DATA)

Wind: 7 miles/hour from NW at 10 meters
Ground Roughness: open country Cloud Cover: 5 tenths
Air Temperature: 63° F Stability Class: C
No Inversion Height Relative Humidity: 50%

SOURCE STRENGTH:

Evaporating Puddle (Note: chemical is flammable)
Puddle Diameter: 100 feet Puddle Volume: 1000 gallons
Ground Type: Default soil Ground Temperature: 63° F
Initial Puddle Temperature: Ground temperature
Release Duration: 1 hour
Max Average Sustained Release Rate: 132 pounds/min
(averaged over a minute or more)
Total Amount Released: 7,350 pounds

THREAT ZONE:

Model Run: Heavy Gas
Red : 34 yards --- (4000 ppm = AEGL-3 [60 min])
Note: Threat zone was not drawn because effects of near-field patchiness
make dispersion predictions less reliable for short distances.
Orange: 110 yards --- (800 ppm = AEGL-2 [60 min])
Yellow: 560 yards --- (52 ppm = AEGL-1 [60 min])

THREAT AT POINT:

Concentration Estimates at the point:
East: 372 yards South: 583 yards
Max Concentration:
Outdoor: 3.11 ppm
Indoor: 1.26 ppm

Toxic Threat Zone

Time: April 6, 2018 0936 hours EDT (using computer's clock)

Chemical Name: BENZENE
Carcinogenic risk - see CAMEO Chemicals

Wind: 7 miles/hour from NW at 10 meters

THREAT ZONE:

Model Run: Heavy Gas

Red : 34 yards --- (4000 ppm = AEGL-3 [60 min])

Note: Threat zone was not drawn because effects of near-field patchiness make dispersion predictions less reliable for short distances.

Orange: 110 yards --- (800 ppm = AEGL-2 [60 min])

Yellow: 560 yards --- (52 ppm = AEGL-1 [60 min])

-  greater than 4000 ppm (AEGL-3 [60 min]) (not drawn)
-  greater than 800 ppm (AEGL-2 [60 min])
-  greater than 52 ppm (AEGL-1 [60 min])
-  wind direction confidence lines

Text Summary

ALOHA® 5.4.7

SITE DATA:
