

## WILLIAMSON COUNTY GOVERNMENT

**Addendum #1**  
**February 6, 2023**  
**RFQ Architects-Variou s Projects**  
**Due February 14, 2023**

Williamson County has received the following questions:

- The RFQ focuses on “architectural” services but does not mention engineers or other consultants. Should we include the primary consultants that we would utilize such as mechanical or electrical engineers?  
Or does the county also have on-call engineering services as well?

*Per the document, we are looking for qualifications for architectural services at this time.*

- In Section 3, it is stated that References will be considered in the selection criteria, but references are not listed in section 4 “Contents of Qualifications.” Where would you like us to include references, how many, and what information is requested?

*You can include references under section B or if you have references from other governments, you can include under section D. There is not a number we are looking for, so include ones that are similar in scope, just basic reference info, the name and contact information and what project your firm completed for the reference.*

- Regarding sufficiency of company’s financial resources, what information needs to be provided?

*In the past, firms have submitted basic info such as length of time in business, balance sheet, income statement, letter from banker they use, Dun & Bradstreet rating, or just a statement that they have sufficient financial resources to provide the services in the RFQ. No firm submitted all of these, this is just some of the information we have seen in the past.*
