SECTION 1 CITY OF CLINTON

1.1 Description

Clinton is located at 36°6'17"N 84°7'43"W (36.104772, -84.128487)[4] at an elevation of 820 feet. The city is situated along the Clinch River, immediately downstream from a point where the southwestward-flowing river bends sharply to the northeast before wrapping around Lost Ridge and continuing again toward the southwest. This section of the river is technically part of Melton Hill Lake, a reservoir created by the impoundment of the Clinch at Melton Hill Dam some 35 miles (56 km) downstream from Clinton. Clinton is located approximately 59 miles (95 km) upstream from the mouth of the Clinch at the Tennessee River.

Clinton is surrounded by a series of long, narrow ridges that represent the western fringe of the Appalachian Ridge-and-Valley province. Northwest of Clinton is Walden Ridge, the eastern escarpment of the Cumberland Plateau.

According to the United States Census Bureau, the city has a total area of 11.5 square miles (29.7 km), of which 10.9 square miles (28.3 km) are land and 0.6 square miles (1.5 km) (4.89%) are water.

1.2 History

Prehistoric Native American habitation was not uncommon throughout the Clinch valley, especially during the Woodland period (1000 B.C. - 1000 A.D.) and the Mississippian period (1000-1550 A.D.). A number of such habitation sites were excavated in the 1930s and 1950s in anticipation of the construction of Norris Dam and Melton Hill Dam, respectively. The Melton Hill excavations uncovered two substantial Woodland period villages along the Clinch at Bull Bluff and Freels Bend, both approximately 20 miles (32 km) downstream from Clinton.

By the time Euro-American explorers and long hunters arrived in the Clinch valley in the mid-18th century, what is now Anderson County was part of a vast stretch of land claimed by the Cherokee. Although the Treaty of Holston, signed in 1791, was intended as a negotiation with the Cherokee to prohibit settlement of the area, including what is today Anderson County, the treaty became ineffective as more settlers moved through the Appalachian Mountains from Virginia and North Carolina into Tennessee. The earliest settlers in Anderson County included the Wallace, Gibbs, Freels, Frost, and Tunnell families. While the flood of white settlers into the Indian domain was cause for several skirmishes, the Treaty of Tellico in 1798 included an origination point (Tellico Blockhouse) for the land to be relinquished from the Cherokee, and allowed for greater ease in settling the area.

Founded in 1801, the town of Burrville was named in honor of Aaron Burr, first-term Vice President under Thomas Jefferson. Land was selected and partitioned for a courthouse, and Burrville was designated as the county seat for the newly-formed Anderson County, Tennessee. Anderson County was partitioned from portions of Grainger and Knox Counties in 1801. Neighboring Roane County, Tennessee, was also formed from a portion of Knox County in 1801, causing Anderson and Roane Counties to be called "sister counties."

On November 8, 1809, by act of Tennessee State Legislature, the town of Burrville was renamed because of the disgrace of the Burr-Hamilton duel, which resulted in the death of Alexander

Hamilton. The selection of the name "Clinton" was most likely to honor George Clinton or his nephew, DeWitt Clinton.

In the early 1900s, Clinton was a thriving port supporting logging and coal mining operations, and was famed for its thriving market in freshwater pearls, an industry doomed by the construction of Norris Dam, which altered the environment for the mussels that made the pearls.

1.3 Significant Characteristics

Visitors to the city may take in Historic Downtown Clinton's streets, lined with century-old buildings housing antique shops and specialty cafes. The Clinch River Antiques Festival draws thousands of visitors to downtown Clinton each year in May and October.

Located at 2819 Andersonville Highway, the Museum of Appalachia is a living mountain village that has been written about in many publications throughout the years. Reader's Digest states it is the little touches of humanity that give this museum a living quality. An axe stuck in a tree stump, firewood stacked neatly against the house, dresses hanging on wall pegs, and utensils ready for use in the kitchen make visitors think that the residents have just stepped out and will be back soon.

The Museum of Appalachia exists through the efforts of one man, John Rice Irwin. The idea for the museum started with a discarded spice grater that Irwin's granny used. He felt it was necessary to preserve the history of the people of Appalachia. Their way of life and the items they used in daily life would represent great historical value to the many people that would visit. He began going to auctions, farms, and places where he could purchase articles that would eventually go into the living museum. His first purchase was an old horseshoeing box. It had been retrieved from the Clinch River which had flooded a half century earlier. Because of John Rice Irwin's admiration for the hardy people of Appalachia, their ingenuity, and craftsmanship, the museum was brought to light.

In August 2006, the Green McAdoo Cultural Center opened, commemorating Clinton's place in history as the first public school in the South to desegregate. On August 27, 1956, twelve young people in Clinton, Tennessee walked into history and changed the world. They were the first students to desegregate a state-supported high school in the South. Clinton High School holds the honor of having the first black student to graduate from a public high school in the South. It was a great victory for the Civil Rights Movement. The events of that school year and the years that followed were commemorated on the 50th anniversary with the opening of the Green McAdoo Cultural Center on August 26, 2006. A bill has been introduced to authorize a study of whether this museum should receive National Park Service status.

1.4 Population and Demographics

It should be noted that although this is a 2011 Plan update, the city level results of the 2010 census were not completely published prior to the completion of this Plan.

As of the census of 2000, there were 9,409 people, 4,201 households, and 2,688 families residing in the city. The population density was 862.8 people per square mile (333.0/km²). There were 4,441 housing units at an average density of 407.2/sq mi (157.2/km²). The racial makeup of the city was 95.47% White, 2.72% African American, 0.33% Native American, 0.38% Asian, 0.28%

from other races, and 0.82% from two or more races. Hispanic or Latino of any race was 0.85% of the population.

There were 4,201 households, of which 27.4% had children under the age of 18 living with them, 47.9% were married couples living together, 13.2% had a female householder with no husband present, and 36.0% were non-families. 31.8% of all households were made up of individuals and 12.7% had someone living alone who was 65 years of age or older. The average household size was 2.21 and the average family size was 2.78.

In the city the population was spread out with 21.6% under the age of 18, 8.9% from 18 to 24, 28.2% from 25 to 44, 23.7% from 45 to 64, and 17.6% who were 65 years of age or older. The median age was 39 years. For every 100 females there were 86.4 males. For every 100 females age 18 and over, there were 81.7 males.

2010 Census

Population: 9,515

2009 Estimates

Males: 4,501 (46.3%)

Females: 5,212 (53.7%)

Median resident age: 39.2 years; Tennessee median age: 35.9 years

1.5 Economy

The 2000 census reported that the median income for a household in the city was \$32,481, and the median income for a family was \$43,099. Males had a median income of \$32,120 versus \$23,550 for females. The per capita income for the city was \$17,730. About 11.8% of families and 16.5% of the population were below the poverty line, including 21.1% of those under age 18 and 11.1% of those age 65 or over.

2009 Estimates

Median household income: \$43,767 (\$32,481 in 2000); Tennessee: \$41,725

Per capita income: \$20,454

Median house/condo value: \$121,927 (\$86,600 in 2000); Tennessee: \$137,300

Clinton has a mix of residential, commercial, and industrial sites typical in cities of its size.

Space is available for new industrial expansion in Clinton’s Carden Farm, Eagle Bend, and I-75 Industrial Parks. Additional sites are considered for this use as they become available.

After extensive environmental and historical studies, Clinton is presently developing a 16 acre tract in Carden Farm Industrial Park along the Clinch River to serve as a park for recreation. Phase one completed the first portion of the river walking trail; phase two has been approved and will extend the trail to Mariner Point subdivision at the eastern edge of the city limits.

In 2006, Clinton annexed 1.3 square miles, extending the city limits along Highway 61 east to the I-75 Exit 122 interchange. This annexation and availability of municipal infrastructure has created a rapid expansion of construction for new businesses in this area.

1.6 Infrastructure

Clinton is governed by a seven-member city council that includes a Mayor. The city has its own Police, Fire, Public Works, and Parks and Recreation Departments.

Clinton is centered around the junction of Tennessee State Route 61 and U.S. Route 25W. State Route 61 connects the city to Norris and Andersonville to the northeast, and the community of Marlow and the town of Oliver Springs to the southwest, following a natural series of pathways through the mountain terrain. U.S. Route 25W connects the city to Knoxville to the southeast and Lake City and Caryville to the north. Interstate 75 intersects TN-61 northeast of downtown Clinton, as Interstate 75 runs in a northwest direction in the northeast quadrant of the county.

1.7 Capabilities

The Legal and Regulatory Capabilities survey documents authorities available to the jurisdiction and/or enabling legislation at the state level affecting planning and land management tools that support local hazard mitigation planning efforts. The identified planning and land management tools are typically used by states and local and tribal jurisdictions to implement hazard mitigation activities. If the jurisdiction does not have this capability or authority, another entity/jurisdiction may have this authority at a higher level of government (county, parish, or regional political entity), or the state may prohibit the local jurisdictions from having this authority

The Administrative and Technical Capabilities survey documents personnel employed by the jurisdiction and the public and private sector resources that may be accessed to mitigate hazards in the community. For smaller jurisdictions with limited capacities, no local staff resources may be available for many of the categories, and public resources at the next higher level of government may be able to provide technical assistance to the community.

For some hazard mitigation actions, federal agencies may provide technical assistance, such as the U.S. Department of Agriculture (USDA) Cooperative Extension Service, which has offices in most counties. The planning team in rural communities must be creative in identifying outside resources to augment limited local capabilities. This information will be used when evaluating alternative mitigation actions.

2011 Update

1.8 Mitigation Goals and Objectives

The Mitigation Committee believes that each of the following goals, objectives, and action items is necessary to begin to address hazard issues in the City of Clinton. The following goal statements represent a broad target for the City of Clinton to achieve through the implementation of its own specific Mitigation Action Plan before the next Plan update.

Table 1.8.1 Countywide Goals and Objectives	
Goals	Objectives
Goal 1: Improve the capability of Anderson County and participating jurisdictions to prepare for, respond to, and recover from all profiled hazards	Objective 1.1: Improve capabilities to evaluate and manage hazard incidents. Objective 1.2: Improve dissemination of all hazards awareness, preparedness, and training information to citizens. Objective 1.3: Improve warning, evacuation, and information capabilities. Objective 1.4: Improve multi-jurisdictional, multi-agency response to all hazards. Objective 1.5: Improve capabilities to recover from all hazard incidents.
Goal 2: Minimize the impact of hazardous materials spills and releases.	Objective 2.1: Identify and establish requirements for fixed sites with reportable quantities of hazardous materials. Objective 2.2: Educate citizens on response to hazardous materials incidents. Objective 2.3: Improve responder safety and response to hazardous materials events. Objective 2.4: Reduce effects to the environment from hazardous materials spills. Objective 2.5: Reduce risk of citizen proximity to hazardous materials incidents.
Goal 3: Minimize the impact of severe weather incidents on citizens and property.	Objective 3.1: Reduce the impact of drought. Objective 3.2: Reduce the impact of extreme temperatures. Objective 3.3: Reduce loss of life and property from high wind, hail, and lightning incidents caused by tropical storms, thunderstorms, and tornados. Objective 3.4: Reduce the impact of ice and snow caused by severe winter storms. Objective 3.5: Minimize utility loss during all severe weather incidents.
Goal 4: Reduce the impact on citizens and property from flash and riverine flooding incidents caused by thunderstorms and tropical storms.	Objective 4.1: Continue participation in and improve citizen awareness of the NFIP. Objective 4.2: Apply for Community Rating System approval. Objective 4.3: Identify and restrict development in flood prone areas. Objective 4.4: Reduce flooding from streams and creeks. Objective 4.5: Reduce repetitive roadway flooding. Objective 4.6: Increase citizen awareness of flood hazard and safety. Objective 4.7: Improve emergency response to flood incidents.
Goal 5: Reduce loss of life and property from urban fires.	Objective 5.1: Increase citizen awareness of fire hazards, prevention, and safety. Objective 5.2: Reduce the incidence and severity of structure fires. Objective 5.3: Improve firefighter safety and urban fire response capabilities. Objective 5.4: Improve water supply in rural areas.
Goal 6: Minimize the impact of wildfires on citizens and property.	Objective 6.1: Increase citizen awareness of and preparedness for wildfire incidents. Objective 6.2: Enforce outdoor burn ban and permit requirements. Objective 6.3: Improve firefighter safety and effectiveness in fighting wild land fires. Objective 6.4: Reduce loss of structures in urban interface wildfire incidents.
Goal 7: Protect the county's citizens and assets from domestic and international terrorism.	Objective 7.1: Increase citizen awareness of and preparedness for terrorism incidents. Objective 7.2: Reduce any loss of life resulting from terrorism events. Objective 7.3: Improve terrorism response and emergency responder safety.
Goal 8: Reduce loss of life and property from meth labs.	Objective 8.1: Increase citizen awareness of meth lab hazards, recognition, and reporting. Objective 8.2: Improve emergency responder safety at clandestine labs.

Goal 9: Minimize property damage and public risk from landslides.	Objective 9.1: Identify areas prone to landslide. Objective 9.2: Restrict development in areas prone to landslide. Objective 9.3: Increase citizen awareness of landslide hazards.
Goal 10: Minimize potential loss of life and economic impact from dam failure.	Objective 10.1: Reduce loss of life from Norris Dam failure. Objective 10.2: Reduce loss of life and property from failure of privately owned dams. Objective 10.3: Reduce threat of private dam failure.
Goal 11: Minimize damage to property from land subsidence.	Objective 11.1: Identify karst prone areas. Objective 11.2: Improve citizen awareness of land subsidence hazards.
Goal 12: Minimize damage and loss of life from earthquakes.	Objective 12.1: Evaluate the potential for a damaging earthquake in Anderson County. Objective 12.2: Increase citizen awareness of earthquake hazards and pre-disaster mitigation strategies.
Goal 13: Minimize the impact of bioterrorism and widespread health emergencies.	Objective 13.1: Increase citizen awareness of and preparedness for pandemics. Objective 13.2: Improve response to bioterrorism incidents and pandemic emergencies. Objective 13.3: Reduce the impact of pandemic health emergencies on business, agriculture, and emergency services agencies.

1.9 Multi-Jurisdictional Mitigation Actions

Each jurisdiction participating in this Plan is responsible for implementing specific mitigation actions as prescribed in the adopted Mitigation Actions. In each Mitigation Action Plan, every proposed action is assigned to a specific local department or agency in order to delegate responsibility and accountability and increase the likelihood of subsequent implementation. This approach enables individual jurisdictions to update their unique mitigation strategy as needed without altering the broader focus of the countywide Plan. The separate adoption of locally specific actions also ensures that each jurisdiction is not held responsible for monitoring and implementing the actions of other jurisdictions involved in the planning process.

The mitigation actions proposed by each of the Anderson County jurisdictions participating under this Plan are contained in individual Mitigation Action Plans (MAPs). Each MAP has been designed to address the specific hazard risk and unique needs of each jurisdiction.

1.10 Mitigation Actions

The actions listed in the Clinton Mitigation Action Plan serve as an easily understood menu of mitigation policies and projects for local decision-makers who want to quickly review their jurisdiction's respective element of the countywide Plan. In preparing the individual MAPs, each jurisdiction considered its overall hazard risk and capability to mitigate identified hazards as recorded through the risk and capability assessment process and to meet the countywide mitigation goals and the unique needs of the community.

The Mitigation Action table contains the following information:

- Responsibility = the responsible department or agency.
- Funding Source = appropriate agency budget and private/public grants.
- Estimated Cost/Benefit = the dollar cost of implementing the action vs. the dollar benefit of having the action in place, i.e., Cost of \$1,000, Benefit of \$10,000 =(\$1,000/\$10,000). The cost/benefit estimates of action items are based on previous and/or expected expenditures and estimated cost avoidance or reduction in life or property loss.

7.2e TR 3	Partner with schools to improve security and lockdown procedures.	Police Chief, School Board	Dept Budget	12,500/ 250,000	Ongoing
Objective 7.3: Improve terrorism response capabilities and emergency responder safety.					
7.3a TR 3	Continue to participate in the Joint Terrorism Task Force.	Police Chief	Dept Budget	12,500/ 100,000	Ongoing
7.3b TR 2	Provide Emergency Response to Terrorism training for all emergency response agencies.	TEMA, Fire Chief, Police Chief	Dept Budget	15,000/ 100,000	Ongoing
Goal 8: Reduce loss of life and property from meth labs.					
Objective 8.1: Increase citizen awareness of meth lab hazards, recognition, and reporting.					
8.1a IL 3	Partner with the drug task force and EMA to distribute meth lab awareness information at community events.	Police Chief, Drug Task Force, EMA	Dept Budget	2,500/ 100,000	Ongoing
8.1b IL 1	Provide meth lab awareness training for citizens.	Police Chief	Dept Budget	5,000/ 100,000	Ongoing
8.1c IL 1	Partner with schools to promote awareness, recognition, and reporting of meth labs.	Police Chief, Board of Education	Dept Budget	12,500/ 100,000	Ongoing
Objective 8.2: Improve emergency responder safety at clandestine labs.					
8.2a IL 4	Continue participation in the state and federal drug task force.	Police Chief	Dept Budget DOJ, DEA	5,000/ 100,000	Ongoing
8.2b IL 2	Provide training and equipment for law enforcement and drug task force personnel.	Police Chief	Dept Budget DOJ, DEA	30,000/ 100,000	Ongoing
8.2c IL 2	Develop meth lab SOGs for emergency responders.	Police Chief, Fire Chief	Dept Budget	5,000/ 100,000	FY 12-13
Goal 9: Minimize property damage and public risk from landslides.					
Objective 9.1: Identify areas prone to landslide.					
9.1a LM 3	Participate in a countywide study to determine and GIS map potential landslide areas.	Public Works, GIS	Dept Budget	12,500/ 500,000	FY 16-17
9.1b LM 3	Conduct meetings between road and planning departments to prioritize potential landslide areas and methods of remediation.	Public Works, Highway Dept	Dept Budget	12,500/ 500,000	FY 16-17

1.11 Mitigation Actions Prioritizing

Prioritizing mitigation actions for each jurisdiction was based on the “STAPLEE” process. “STAPLEE” uses multiple factors under the categories of Social, Technical, Administration, Legal, Economic and Environment. The original “STAPLEE” factors have been modified to enhance the prioritization process. The enhancements include adding life, property and economic items to the Social category and implementing weighting factors to Social and Economic categories. A weighting factor of 3 is used for loss of life, property, and economic loss. A weighting factor of 2 is used for cost/benefit items. The actual “STAPLEE” table used for prioritization is at the end of this section.

Table 1.11.1 “STAPLEE” Prioritizing Process			
Issue	1	2	3
Social			
High Community Acceptance	Potential objection from public and/or very expensive	Unknown if objectionable, or costs may be significant	Not objectionable and low/no costs
High Effect on saving lives	Life saving impact is low	Life saving impact is moderate	Life saving impact is significant
High Effect on reducing property loss	Effect on reducing property loss is low	Effect on reducing property loss is moderate	Effect on reducing property loss is significant

Effect on reducing economic loss	Effect on reducing economic loss is low	Effect on reducing economic loss is moderate	Effect on reducing economic loss is significant
Technical Technical Feasible	Technology not currently existing	Emerging or untested technology or unknown	Technology readily available
Is a Long-Term Solution	No, is not effective in helping reduce losses in the long term	Potentially or unknown	Yes, is effective in helping reduce losses in the long term
No Secondary Impacts	Yes, likely to create secondary problems	Potentially or unknown	No, unlikely to create secondary problems
Administrative Little Staffing is required	Need to hire a permanent employee(s)	Potentially need to hire a temporary employee(s) or unknown.	Do not have to hire
Funding Potential is high	No obvious source of funding available and action has significant cost impact	Limited or unknown funding available	Little or no funding required or funding can be readily obtained
Low Maintenance and Operations	The action is likely to require high level of ongoing maintenance	Unknown or action has the potential for moderate ongoing maintenance	Action requires limited or no ongoing maintenance
Political High Political Support	Local Elected Official likely to be contentious	Local Elected Official may be controversial	Local Elected Official likely to be supportive
Local Champion available	Unlikely there is a Local Elected Official to support	Uncertain if there is a Local Elected Official to champion	A Local Elected Official is likely to support and champion
High Public Support	Public Political support is unlikely	Public Political support is uncertain	Public Political support is likely
Legal State Authority Exists	No legal state authority exists	Legal state authority is unclear, uncertain or adoption is in progress	Legal state authority exists
Local Authority Exists	No legal authority exists	Legal authority is unclear, uncertain or adoption is in progress	Legal authority exists
Potential Legal Challenge is high	High likelihood of legal challenge by stakeholders	Moderate likelihood of legal challenge by stakeholders	Low likelihood of legal challenge by stakeholders
Economic High Action Benefit	Low benefit to the jurisdiction from the action	Moderate benefit to the jurisdiction from the action	High benefit to the jurisdiction from the action
Low Action Cost	High cost to implement action	Moderate cost to implement action	Low cost to implement action
High Economic Contribution	Low contribution to other community economic goals	Moderate contribution to other community economic goals	High contribution to other community economic goals
Outside Funding is Required	Likely for action to be delayed pending outside sources of funding	Possible for action to be delayed pending outside sources of funding	Unlikely for action to be delayed pending outside sources of funding
Environmental Low Land/Water Effect	High likelihood of negative consequences to land/water	Moderate likelihood of negative consequences to land/water	Low likelihood of negative consequences to land/water
Low Endangered Species Effect	High likelihood of potential negative consequences to endangered species	Moderate likelihood of negative consequences to endangered species	Low likelihood of negative consequences to endangered species
Low Hazmat Waste Site affect	High likelihood of potential affect on hazardous materials and waste sites	Moderate likelihood of affect on hazardous materials and waste sites	Low likelihood of affect on hazardous materials and waste sites
