

**ADDENDUM TWO
HCSO-CPD TARGET SYSTEM
CONTRACT NO. P-16-005-201
CITY OF CHATTANOOGA, TENNESSEE**

The following changes shall be made to the Contract Documents, Specifications, and Drawings:

I. Questions

- A. It is unclear who would be in charge of the demolition and removal of existing equipment. Please clarify.
 - i. **Existing equipment will be removed and demolished by others.**
- B. With the existing air compressor being reused, it would be helpful to have photos and specs to determine if our equipment is compatible.
 - i. **Photographs of existing air compressor are included in this Addendum.**
- C. Part 2 – Products, Section 2.01 under “e”, is there any clarification on what exactly needs to be painted or powder-coated black? Any more clarification here would be helpful.
 - i. **The turning targets are being installed out of doors in an uncovered area and will be subjected to corrosion. Exposed steel components shall be galvanized, stainless, painted, or powder-coated. Exposed, unprotected carbon steel for target bases, turning mechanism assemblies, and other critical components will not be acceptable. Black is preferred for uniformity for the painted or powder-coated components, but other submitted colors may be approved at the Owner’s discretion.**
- D. Drawing 1 of 2 shows 31 targets. Please confirm number of turning targets desired as drawings and description of work differ.
 - i. **30 turning targets is the correct number of targets included in this Contract.**
- E. Add Alternate 2 is calling for two separate target carriages but to only include one moving target initially. Are two separate tracks to be installed or would the additional carrier be added to the same track? Please clarify.
 - i. **The Department would prefer a single track with two target carriages for Add Alternate 2, provided the carriages can be independently controlled for both direction and speed. If the Vendor’s equipment requires two tracks, then two separate tracks would be acceptable.**
