 CONWAY, SC 29526-6005

AMENDMENT No. #1

Posting Date: Monday, February 10, 2020

Solicitation Number: 1920-40MJ
Description: ColdFusion Migration

AMENDMENTS TO SOLICITATION: (a) The Solicitation may be amended at any time prior to opening. All actual and prospective Offerors should monitor the following web site for the issuance of Amendments: <https://vrapp.vendorregistry.com/Bids/View/BidsList?BuyerId=2f302e8a-69b0-407b-a21a-3368d004365e> (b) Offerors shall acknowledge receipt of any amendment to this solicitation (1) by signing and returning the amendment, (2) by letter, or (3) by submitting a bid that indicates in some way that the bidder received the amendment. (c) If this solicitation is amended, then all terms and conditions which are not modified remain unchanged. [02-2A005-1]

QUESTIONS FROM OFFERORS - AMENDMENT (JUN 2017): The solicitation is amended as provided herein. Information or changes resulting from questions will be shown in a question-and-answer format. All questions received have been reprinted below. The "District's Response" should be read without reference to the questions. The questions are included solely to provide a cross-reference to the potential offeror that submitted the question. Questions do not form a part of the contract. The "District's Response" does. Any restatement of part or all of an existing provision of the solicitation in an answer does not modify the original provision except as follows: underline text is added to the original provision. Stricken text is deleted. [02-2A097-1]

Question Number	Question	Answer
1.	CF 2018 - standard or enterprise License?	HCS intends to deploy the Enterprise version.
2.	Are there any java integrations or uses of Java within the CF code? A good example is using Java for file manipulation, image manipulation, networking, secure connection handling etc. Many times an application may use a <i>third party java class</i> - typically a jar file. These may need to be replaced or recoded to use something else. Knowing these exist (or not) can help our estimate.	There are no java integrations of which we are aware of.
3.	<i>Resolve any code refactoring issues</i> – I presume this does not mean refactoring the whole code base. Where something works and does not present a security or other issue, we leave it alone. Refactoring in this case means resolving code issues that result from the migration. Do we have that right?	Correct; where something works and does not present a security or other issue, leave it alone.
4.	Is there a code repository (Git or SVN etc)?	No there is not.
