

E-Rate Fiscal Year 2017 Category 1 WAN RFP

Q&A Round One- November 30th, 2017

1. Who does the District currently use for WAN and what bandwidths do you currently have in place?

We currently have CenturyLink MOE (Metro Optical Ethernet). 2400 Slater Avenue has a 2 Gbps (Gigabits per second) connection where all WAN traffic comes back to. Harrison High School (2755 Janitell Road, Colorado Springs, CO 80906) has a 500 Mbps (Megabits per second) connection, and Sierra High School (2250 Jet Wing Drive, Colorado Springs, CO 80916) has a 500 Mbps connection. The remaining 18 sites each have a 200 Mbps connection.

2. Can you send a list of the hardware you'd like to see pricing on?

At this point we are looking for Category 1 WAN service, not Category 2 equipment. We may or may not release a Category 2 form 470 and RFP for this year.
