**Addendum #02**

**March 22, 2023**

**IFB 23-B0046**

**New Kitchen Equipment for the Myrtle Beach Convention Center**

The purpose of this Addendum #02 to IFB 23-B0046 for New Kitchen Equipment for the Myrtle Beach Convention Center , dated March 8, 2023, is to answer the following questions:

1. Rational requires an authorized factory trained service agent for install or a commission is required upon start up if it is not done correctly per Rational. I included that in the original spec'/quote yet it does not call for it in the spec'. It does have a bullet point for installation, but I think further clarification is required. What is called out for installation seems like a blanket for all equipment.  
**The new units will go in the same place as old. The contractor can be the installer as the electric, gas and water are there now from the existing units.**
2. Are these units replacing the current Rational ovens or are they in addition?  
**We all agreed we just want to replace the 2 ovens with the new ones as the old ones are 12+ years old.**
3. Uninstall/install obviously by a licensed plumber/electrician?  
**Yes, per code.**
4. Equipment being uninstalled is to be removed and discarded or moved to City Storage?  
**All the old equipment will be hauled away by installer.**

Thank you,
