**Addendum #02**

**May 10, 2019**

**IFB 19-B0104  
Monument Sign**

The purpose of this Addendum #02 to IFB 19-B0104 for Monument Sign, dated April 23, 2019, and previously amended on May 3, 2019, is to answer the following question:

1. Per your specifications for the monument sign (page 22), the masonry base is by others. Please confirm "direct imbed installation with twin steel columns and concrete footings for steel columns and slab for masonry base as shown" (per drawings under Installation) is to be included in our scope of work. Specifically, will the vendor be responsible for the direct imbed (pouring concrete footings, slab), or will the footings/slab already be in place as part of the masonry by others and thus only installation is necessary?

**ALL** masonry work is to be part of the specifications. This includes all footings, slabs, veneers, caps, etc. Only the final electrical connection to the primary source will be done by others. Other elements of the electrical work, including internal circuits, lamps, power supplies, etc. will be provided by vendor.

Sealed bids will now be due no later than Tuesday, May 21, 2019 at 2:30PM (local time.)

Thank you,
