Specifications

Section 1: General Requirements – REVISED

1.1 Scope of Work

Contractor must clean grease and grit from the below described wastewater wet wells. All materials must be properly disposed, and the Contractor must supply completed manifest signed by the Landfill. Contractor will be required to manifest each load and provide copies of manifests with billing invoices. No material cleaned from CCWA wet wells is disposed of at CCWA facilities. Currently the material cleaned out from CCWA wet wells are disposed of at the Pine Ridge Landfill, located at 105 Bailey Jester Road, Griffin GA 30223, phone number 478-750-0265.

Contractors' entry to CCWA property must be escorted by CCWA staff during the approved work schedule, which usually takes place from Monday through Friday between the regular hours of 7:30 a.m. and 4:30 p.m. The Contractor may setup the day of the week for which services can be performed. CCWA will select the sites for which the services will be performed on an as needed when needed basis.

The quantities shown below are estimated quantities for bid evaluation purposes only. Actual quantities are uncertain. No quantities are guaranteed and are not intended as such. CCWA reserves the right to purchase services on an as needed when needed basis.

Unique “Emergency” Requirements

Contractor may be required to pump out liquid raw sewage from various locations throughout CCWA's collection system including manholes, lift stations and other wet wells, after regular hours on emergency basis. This liquid waste may be introduced back into CCWA's treatment system either through a manhole or at a CCWA Water Reclamation Facility as determined by CCWA staff. This material should be billed at a reduced rate considering there will be no need to transport this waste to a different treatment and disposal facility for processing. In no instance will the contractor discharge this material into the system without a CCWA employee present. This type of waste will be variable in volume, so no estimate will be given. Contractor must submit a completed manifest with each load with billing invoices.

8. Other Locations as Needed	TBD	TBD	TBD	TBD
Yearly Estimated Total Number of Gallons				196,413

** All 41 wastewater lift stations are located within a 20-mile radius of the City of Jonesboro (See Exhibit B). We will require cleaning of three (3) sites per trip for these stations. Each station will need an estimated 1,000 gallons of material cleaned and disposed for a total of 3,000 gallons per trip. Approximate total yearly for lift stations is 30,000 gallons.

Due to the location of some of our lift stations, access constraints may require different size equipment, longer hoses and the likes to provide the services as required. It is the contractor’s responsibility to inform themselves of such constraints and take that into consideration when submitting a bid.

1.2 Payment Terms

The Authority shall pay the Contractor net 30 days after receipt of an invoice and approval of Contractor’s services as rendered. Along with the invoice, the Contractor must submit manifests showing signatures for Generator, Hauler, and Disposer for all loads. Invoices must show details to include: date, description, quantity, rate, and amount per service rendered, and must be legible.

1.3 Special Provisions

No work will be assigned to subcontractors without the prior written approval of the CCWA.

The Contractor shall provide the necessary insurance and other requirements as per attached “Risk Management Requirements”.

I have read and understand the scope of work, conditions, and requirements. I also understand, and have provided, all documentation required to be included in this Request for Bid. Omission of any part of the requested documentation may result in the disqualification of the bid by the CCWA.
