ADDENDUM #1

REFERENCE: RFQ 19-03 AIR HANDLER REPLACEMENTS, BLDG 12

This Addendum addresses questions received from vendors.

Questions & Answers:

1. We are submitting on this and I was wondering if the 10 project pages provided must come from the lead firm or if they can be a combination between lead and sub.

Response: They can be a combination between lead and sub.

2. Please clarify the need for a Technology, Communication Security consultant. Due to the nature of this project, it is not clear in the scope why this consultant is required. Also, please specify what their exact scope of work would be for an air handling replacement project.

Response: That should have been removed or marked NA. There is no requirement for those disciplines in this project.
