

Wayfinding and Brand Incorporation Program

Addendum No. 2

9/9/2019

1. Q: Please confirm that you are looking for park and trailhead identification sign types only and not sign types for within the park and/or trail.

A: The Town is looking for a proposal to prepare/design wayfinding signage to be placed throughout Town (along roadways primarily to direct folks, both local and tourists to various places). This is not a RFP for park signage per se, although, designs may lend themselves to multipurpose signage applications for various programs, departments, locations, etc.

2. Q: We are a graphic design firm and prepare design intent drawings in Adobe Illustrator versus sealed construction drawings in AutoCAD format. The selected sign fabricator generally prepares shop drawings during the fabrication process. Is this acceptable?

A: This proposal need not include shop/construction drawings. But, the proposal needs to be submitted in a sealed package, otherwise, it will not be accepted.
