

RFP WCS-TR-2018-002 Fleet Fluids and Lubricants

Question and Answer #2

**Page 8 Paragraph 2.18 Regarding fixed pricing. The oil companies pushed through 4 increase in 2017 and we have one additional coming into market in Feb/March time line with trade information that another is coming in 2nd qtr of 18. Question-could this be a current cost bid and then the ability with documentation from oil company to allow for the change in cost to reflect market conditions. As otherwise the add on to try and justify pricing pushes your cost of goods up considerably.

We will stay with the RFP requirement of a fixed price for each calendar year. The contract allows for mutually agreed to annual price adjustments.

** Equipment List page 16 calls for loan of bulk oil tank to be placed on a Mobile Service Truck. Understanding we would be selling the product to you that is in tank but as tank is our loaned equipment the question arose as to Liabilities should vehicle be involved in incident resulting in spillage, fire or separate from vehicle and other wise cause damage. It is possible we could be held libel thus are provisions in place to hold us apart from any such event.

We have discussed with our insurance company. Whitfield County Schools will be liable for the tanks on Whitfield County Schools vehicles. The successful respondent will be issued a Certificate of Insurance whereby it will be covered up to the limits of the policy. Currently that is \$1,000,000 per occurrence.
