Q&A for RFQ 145708 – Solids Optimization

Q: Can information please be provided on the potable water uses in the digester system, specifically where it is delivered and flow rates, if possible?

A: The water for the Digester comes in on the north side of the building. The September usage was 455,977 gals.

Q: The RFQ states the proposal is limited to 20 pages front and back. It also states that certain sections are limited to one page, or five pages, etc.

- a. When the proposal states "20 pages front and back" does that mean 20 numbered pages or 40 numbered pages?
- b. Is the approach limited to 5 numbered pages or 10 numbered pages?
- c. Are resumes limited to one page or two?

A: 'pages' in the context of the RFQ means sheets of paper. Each sheet may have printing on one or both sides.

Q: Are there any previous reports related to solids handling, digestion and dewatering that are pertinent to the current efforts, and can they be provided??

A : That question was asked during the pre-RFQ meeting and Waste Resources stated there are some reports that would be made available to the selected firm.
