

LMIG Road Resurfacing

Addendum #1 – March 2, 2020

We have received a variety of questions related to the LMIG Road Resurfacing. We have attempted to provide answers to those questions below. We thank you for your interest in doing business with Jones County.

1. Will there be any milling required for this project? NO
2. Will new asphalt be placed on top of the old? YES
3. What kind of emulsion is required for Fortville RD? CRS 2
4. Is H. Lime required in the asphalt mix? YES
5. On Otis Redding Road and Overland Way I have measured an existing pavement width of 24ft instead of 21ft. This would increase the surface area of the two roads. The measurement should be 24ft. Please see the attached revised list of roads and measurements.
6. On Fortville Road there is zero quantity for Tack Coat, even though the Emulsion will be used with the application of #7 stone. The quantity should be 1,996 gallons. Please see the attached revised list of roads, measurements and quantities. Please use the attached revised bid form.
7. On Fortville Road the asphalt leveling quantity is listed as 45lbs. The correct listing should be 50 lbs.

Bid Form – REVISED – ADDENDUM 1
