

Retro-Reflectivity Sign Project

Contract Number: T-14-002-201

Chattanooga Department of Transportation

1. Detail on the five sign types:
 - 713-16.50 – approximately one third of these standard, MUTCD, sign replacements will be two signs on one post, such as a Stop sign and ALL WAY plate. CDOT has made efforts to group replacements to maximize productivity, such as replacement of all stops at an intersection, object markers for both directions, or all chevrons in a curve.
 - 713-16.51 – all post mounted street name plates are single sided plates bolted back-to-back on a square post. Each post has 4 name plates, so replacement of 2,250 name plates will mean work on about 260 posts. Residential intersections (SL 25) get 8" tall signs. All others will be 10" tall.
 - 713-16.52 – these post mounted replacements are a type XI fluorescent yellow green. About ninety percent of these will be 2 faces replaced on one post, such as a Bike (W11-1) and Share the Road (W16-1P).
 - 713-16.53 – these overhead, street name replacements will require a bucket truck or similar to replace signs on traffic signal span wire or bolted to mast arms. The majority will be single sided signs with some double sided on span wire. The standard size blank will be 60x18 inches.
 - 713-16.54 – these overhead, standard, MUTCD, sign replacements will require a bucket truck or similar to replace signs on traffic signal span wire or bolted to mast arms. These are MUTCD signs like Lane Control (R3-5 to R3-8) or Turning Vehicles Yield to Peds (R10-15).
2. When needed for sign height adjustment, will posts be provided?
 - CDOT signs crews will provide stubs as needed for the contractor to adjust sign height. These stubs will be bolted on the existing posts.
3. When will the tablet with signs to replace be provided?
 - The tablet will be provided to the chosen contractor.
4. Are stainless steel bolts required?

- Signs are to be installed with hardware meeting TDOT specification and sign vendor's requirements. Galvanized steel is acceptable. Use nylon washers as required by sheeting type.
5. Are all signs to be .08 or will there be any oversized signs requiring .125?
- All signs will be .08 gauge aluminum.
6. What will be required for clearing sign obstructions?
- All vines are to be cleared from signs posts and all limbs or brush that could obscure the sign faces visibility. These clearing tasks will be light and can be done with a string trimmer and bypass lopper.
7. What happens if the project cannot be completed by 12/31/2019?
- CDOT realizes that a bid delay has us close to the project deadline. We will begin a local programs request for a 6 month extension.
8. Is there a list of signs to replace?
- An export of the majority of the signs to be replace is part of this addendum. The final list will be issued through the tablet Sign Management System.
9. Are contractors responsible for brackets like overhead swinger brackets?
- Contractors shall provide signs and their required bolts and washers. Existing brackets and posts are to be reused. Notify the City if a bracket or post is in poor condition, and a replacement will be provided.
10. How are leaning signs to be fixed?
- Contractors are to ensure all post are straight and firm when new sign is installed.
11. Will more than one tablet be provided for multiple crews?
- The City will provide one tablet, but additional, web based, sign-ins will be provided for contractors to access the City's Sign Management System from additional devices of their own.
12. Will there be new sign installations?
- No. The project will remove and replace signs on existing posts and brackets.
13. What about liquidated damages?
- This federally funded project follows TDOT's local government guidelines.
14. We thought we heard something about red reflective post strips going all the way around each stop sign post but did not catch all the details. Does part of the contract include putting the red reflective post strips around each stop sign post or is that something that is supposed to be already installed on the post and we are just changing out the sign itself? If

the strips are to be added, is there going to be a pay item added for that or is it something the city will provide?

- There are no reflective strips to be added to any posts. The project is to take down fade signs and install new signs. No additions.

15. When submitting your sealed bid, Section 00201 Contractor's Identification form MUST be completed and placed on the outside of the envelope. See "Section 00201.Federal Funds" Below.
16. The Sign-In Sheet from the Pre-Bid Meeting is attached below.
17. Please submit in writing any contract questions about or not addressed in the bid document to Debbie Talley, and they will be answered with the assistance of the project's CEI, Asa Engineering & Consulting, Inc.
18. The Bid Opening for this project has been extended to **Thursday, September 19, 2019**. The time and location remain the same (2:00 PM at The Purchasing Conference Room).

Opening Date: SEPTEMBER 17, 2019 at 2:00 PM
