The following questions were submitted:

34th Street Area Water Main Replacement – TAG 597

1. What is the reason for replacing the water main in this location? - Break history & age.
2. Where the 34th Street NW and 35th Street NW water mains cross Cleveland Avenue NW, can this be done by open cut or does it have to be bore and jacked? Is horizontal directional drilling allowed for the ductile iron water main pipe? - The main on Cleveland Ave. is scheduled to be replaced prior to the start of construction for this project. Water mains will be extended from the Cleveland Ave. water main into 34th and 34th streets and reconnect into these mains.
3. With the condition of the asphalt pavements in the work area, would the restoration of the pavement be the full width of the street? - This will be determined at a later date. Currently, pavement restoration is not planned to be full width.

Harvard Ave Area Water Main Replacement – TAG 598

1. What is the reason for replacing the water main in this location? - Break history & age.
2. With the condition of the asphalt pavements in the work area, would the restoration of the pavement be the full width of the street? - This will be determined at a later date. Currently, pavement restoration is not planned to be full width.
