

WILLIAMSON COUNTY GOVERNMENT

October 28, 2019
Addendum # 1
Solid Waste Roll Off Trucks
Bid Date November 21, 2019, 2:00 p.m.

Williamson County has received the following question and is updating the specifications:

- Looking over the bid, it asks for a DD13 engine (this only comes in a Freightliner). Would Williamson County be open to a Mack truck as long as I can meet torque / horsepower requirement?

The DD13 comes in at least a Freightliner and a Western Star. However, we would consider the equivalent to the DD13 specified.

- On page 1 of specifications for Roll-Off Hoist, remove the following language:

*Engine In-line, DD 13 Engine 6-cylinder diesel, minimum 410 hp.1550 ft.-lbs. torque,
775 cu. in./12.8 liters, 2010 EPA*

And replace with the following language:

Engine In-line, DD 13 Engine 6-cylinder diesel, minimum 470 hp.1650 ft.-lbs. torque, 13 liters

- All other specifications remain the same.
