Questions and Answers

Q1 While the RFP indicates that there's a NNL provision on the in-force CIGNA policy, I don't see any such provision included in the copy of the CIGNA policy provided to us. Can you please confirm if a rate cap is currently in place and the percentage. That will have about a 7-9 point difference.

A1 The current policy does not have a rate cap or no new laser provision. It is not required that a vendor include this, but if included these enhancements will be considered as a part of the evaluation and selection.

Q2 As it is nearing the end of July, we would really need June data in order to have a medical review completed and a FIRM proposal issued. Please let me know if June claims can be provided.
