2. Please advise if the 4 different locations listed under "School Transportation" ever receive loads together (split loads).

School Transportation only purchases diesel fuel.

3. If they do not, does each location listed under "School Transportation" order their own fuel and get their own loads delivered?

Purchase orders are given to the School Transportation Director and he orders fuel as needed for each of the four locations.

4. Does the Highway department order split loads of the gasoline and diesel or do they order each product separate?

Yes, they order split loads.

5. Please provide a copy of the prior bid tabulations, bill of ladings and invoices for our records.

Bid tabulation is attached. My office does not have bill of ladings or invoices.

6. Please advise what a typical load size is for each location.

The Highway Department never orders less than whatever a tanker hauls. It could be 6,000 gallons of diesel or 3,000 gallons of diesel & 3,000 of gasoline.

The School Transportation Department orders 7,500 gallons at a time for the School Transportation tanks and 4,000 gallons at a time for each of the other three locations. The Oliver Springs locations requires that fuel be delivered in a "wagon".

7. Please also clarify on what gasoline and diesel products we are bidding on as it just states gasoline and diesel but the bid form states "premium gasoline and diesel".

Diesel is ultra-low highway diesel. (Seasonal mix in winter.) Gasoline is 87 octane.
