Questions and Answers

Re: 2019-07 Aggregate/Cinder Materials

Q: What is the approximate quantity needed?

A: **Varies per item. Mainly will use 1 inch minus and 2 inch clean.**

Q: Is there any approximate minimum quantity when you issue purchase order each time? Or you request all material in one purchase order?

A: **Do not issue a purchase order for the entire year. Will issue a purchase order for either a specific project or rock for general use such as when we regrade gravel roads.**

Q: Approximately how much was ordered the previous year?

A: **Budgeted amounts are \$550,000 for rock for general use to maintain gravel roads and \$100,000 in various other purposes. May need additional rock for other purposes for other types of projects.**

Q: On the pricing form, 1" minus is classified as the same as 1" base and 1" clean should be separate? Same for 2" and 3"?

A: **Clean rock is not base rock so base rock can be struck. Same for 2" and 3" – see ADDENDUM**

Q: Where are the locations that will need the trap rock?

A: **Locations are unknown at this time.**

Thank you,

Kathy Hardeman
