Question and Answers  
June 29, 2017**

1. I have a question regarding the trash liners. Do you have more specific details such as what thickness of the liner, color and do you have usage numbers from your previous year for these items being bid on?

Answer: The School Department uses liners that are .55 mil in thickness and "natural" in color. The School Department used approximately 252,000 small trash can liners and approximately 37,000 large trash can liners in the past year. Order information for the other Departments is not available.
