2. **QUESTIONS/ANSWERS**

1.	Item number 4; it has the per tank for annual pyro chem and range guard. One of the things that I am wondering is what size is the tank that we are testing are we basing get off of a standard 3 gallon tank?
<b>Answer</b>	The unit cost for these items is for hydro testing the different tanks. The cost was different depending upon the brand. We ask for an all inclusive price. We ask for the pricing in this manner because not all contractors would include all the items we ask for if you ask just for a price for hydro testing.
2.	line five it has the unit cost of recharge agent per gallon the above manufacturers all have different pricing per gallon some are a little more some are a little less
<b>Answer</b>	The cost of the agent per gallon was needed in the event the system was activated and the tanks had to be refilled. The cost per gallon did not come into play on a hydro test.
