Dated: December 29, 2017

Acknowledgment of receipt of this addendum **MUST BE SIGNED AND INCLUDED IN YOUR RESPONSE TO THE RFB.**

REVISION:

Replace original Bid Form pages 2-4.1R through 2-4.8R with revised Bid Form provided with this addendum with pages 2-4.1R2 through 2-4.11R2. The revision includes adding an Oil and Filter Change Cost column to the Bid Form as an “as needed when needed” item cost. Please note the Oil and Filter Change Cost will be used for informational purposes only and will not be considered in determining the lowest responsible responsive bidder.

QUESTIONS:

- 1. Since you are requesting that oil and filters be changed based on the results of an oil lab sample / analysis and not frequency based; a separate column is needed on the price sheet so that you will know how much extra it would be to provide the oil and filter changes. This bid is identical to the 2015 bid and if you look at the attached you will see that the added column was needed as well as a brief clarification. As the bids are identical, the 2015 Addendum 2 document is still relevant and should be applied as these are clarification questions I would still ask. If you could incorporate the same clarification verbiage and the updated price sheet provided in the attached addendum, that would be great.**

Answer:

CCWA has added an oil and filter cost column to the bid form as an “as needed when needed” item cost. See Revision above.

2. As you look to sampling as an indication of oil condition, would you also want fuel samples taken in order to determine when fuel filters needed to be changed versus just changing them annually and they may not be needed? This would also tell you if the fuel in the tank needed serviced. On that same note would you want coolant samples taken to understand the condition of each units cooling system? This would bring your test first approach full circle and provide the best snap shot as to your units overall condition.

Answer:

CCWA will continue to replace fuel filter on an annual basis along with checking the coolant.
