

“City of Havelock, WWTP  
SG-3 and SG-4 Slide Gate Repair”

Addendum 1

July 24, 2023

Questions Received

1. I can give you a price to go and bypass the bar screen and inspect the slide gate to determine what is wrong. If it is a simple fix, we can do that but if it is parts needed then we would have to order the parts and re-install the bypass at a later date again to do the repairs. This additional work would require a change order to complete the work.

Assume that the slide gate can be repaired for this scope of work. If the Scope of Work changes for unforeseen reasons we will address the change at that point.

2. We would not be held accountable for liquidated damages if the gates cannot be repaired at the time of the original shutdown if it is determined that parts are needed.

If additional parts/work is needed the period of performance will be adjusted.
