ADDENDUM 2

To: All Prospective Vendors

From: Kristinia Davis,
Purchasing Agent

Re: Questions

Subject: #14124215(KD)West Ridge Tree Felling

Date: February 8, 2024

This addendum is issued to provide final answers to questions received as of 2/7/24. It shall be considered as part of the contract subject to all the general conditions thereof, the same as if attached to and included in the original specifications. All items included in the addendum shall be covered in the Bid as submitted by the Vendor.

1. **Question** – Question regarding stream protection plan: Would we be able to build a log bridge by placing logs into the stream to cross equipment while working daily to mitigate the stream banks getting disturbed. Or what is an adequate protection plan, aka the goal for stream protection?

Answer – Temporary stream crossings will not be allowed as part of the Tree Felling Project as a temporary stream crossing would require review and approval from TDEC. As part of this project two separate staging areas were specified, one on either side of the stream, so that no stream crossing would be required to complete the work. It is the Contractor's responsibility to ensure the stream is protected from sediment and erosion at all times. If any damage is caused to the stream during the course of the project, it will have to be repaired and paid for at the expense of the Contractor.

Any questions regarding this Addendum, please contact Kristinia Davis at kris.davis@sullivancountyttn.gov
