

QUESTIONS 2

1. Is additional cable management allowed in order to improve aesthetics? **Yes**
2. Is there a cable naming standard for the school district. **IDFName-PanelLetter/Number-PortNumber (MDF-A-25)**
3. Is replacing the POE adapter with POE switch an option? **Only for cameras**
4. Is this a fixed cost project? **There will be some wiggle room regarding items that the school system may be over looked but very little. Once the project is approved by our board the cost is fixed any adjustments will require Board approval.**
5. Replacing a patch panel normally requires re-certification. What is the standard for cable re-certification? **We need a cable verification test – verify that all wires in the link are connected to the proper termination points and not to any other conductors.**
6. Older cabling (Cat-5) may not support the bandwidth of the equipment. What is your guidance on these situations? **There should be nothing other than Cat5e or Cat6 in use.**
7. Is cable labeling on both ends a requirement for patch cards? **Patch cables do not have to be labeled. Only patch panels and at the drop location.**
8. Will they authorize progress payments in the contract? **Payment can be issued based on work completed as long as it is submitted by completed school.**
