

## 2024-13 Tires

### Questions + Answers

1. Does the county mount passenger/light truck/medium truck tires at the garages or does the vendor do all of it? **We do mount most all of our own tires.**

2. If the vendor does the labor, what's the expected turnaround time? **A couple of days.**

3. On any on site service for the larger tires, the fee is charged hourly, so that could vary based on the location of the machine, tractor, etc. How do we include that cost in the price of tire when we cannot predict how long the service will take? **Have them write in an hourly rate.**

4. Any tires that are on the state of Missouri contract, pricing is dictated by the manufacturer, not the dealer, most of these pricing programs end 3/31/24, to be renewed 4/1/24, prices are subject to change, how do we accommodate for this? **In the past we just pay the price that the Missouri contract price is at that time.**

5. Any ticket generated by Pomp's tire for service, either in shop or on site, include other shop fees that vary based on the type of service, i.e. fuel surcharges, shop/road service supplies. How do we accommodate for these charges since they vary? **I assume the supplier puts thee service charge on the invoice to be paid.**
