

Okeechobee County Tourist Development Council

Question and response for Visitor Profile and Study for request for proposal.

1. Will Okeechobee County be able to provide a database with contact information for the purpose of quantitative research studies to the various audiences? **At this time I do not have one database, will be working to begin one this upcoming fiscal year. This will be a more hands on study where a representative will come to the community during season and ask questions and collect some basic data.**
