

RFI Question on Mira Monte Field Restoration project 2021-1218

5-21-21

Question: Base material and came across this in the spec.

Base Material: Shall conform to crushed aggregate base or crushed miscellaneous base in accordance with section 200-2.2 or 200-2.4, respectively, of SSPWC.

CAB is going to be more costly than CMB, which one are we to bid?

Answer: The contractor should follow the specs and provide the most cost-effective bid possible. Sometimes contractors cannot source CMB, so we don't want to pigeon-hole the project. If the contractor can source CMB and it makes for a lower bid price than CAB, then great!
