All curb valves must be able to withstand minimum torque requirements of 125 ft. pounds input turning torque:

- a) Against the check in the opening direction
- b) Against the check in the closing direction
- c) With plug restrained in the open position (to stimulate blockage)

The inlet and outlet connections may be one of two types as called for in the bid items, copper flare or compression (see specification for compression joints) flare joints for copper tubing services shall have threads which comply to and conform with table two and conform with table two of AWWA C-800 latest revision; coupling nut threads shall conform to table three of AWWA C-800 latest revision.
