To Qualifying Vendors:

We will be awarding this year's bid on a per item basis, which is a change from the last few years. This will require a pre-bid meeting to go over the changes in the bid process.

Walker County Schools has a Chemical Management System in place and we also have some products that should be certified Green. We are inviting you to bring your product/products to a pre-bid meeting if you are interested in participating in the bid. Your product/products will not be considered if you do not attend the pre-bid meeting on Wednesday, April 8, 2015 at 11:00 a.m.

Walker County Schools now uses jumbo roll paper towels and toilet paper along with the universal jumbo roll dispensers for each. Therefore, dispensers considered for bid would need to be universal. Paper products considered for bid would need to be jumbo and fit with the universal dispensers. We also use Green Certified Foam Hand Soap. Only Kimberly-Clark or Deb will fit in the dispensers. We will not consider changing out the dispensers.

These items plus the attached list of other warehouse items will be part of the "per item" bid package this year and will be awarded by line item. Please feel free to bid on any or all items that your company has to offer.

The pre-bid meeting will be held Wednesday, April 8, 2015 at 11:00 a.m. to provide more information about the Chemical Management System product requirements and to verify that the samples submitted will work with our current dispensers. Please be sure to bring a sample of the items mentioned above to the pre-bid meeting. Specifications of products and Material Safety Data Sheets will also need to be provided for all chemical products. The paper products should be of good quality and a sample must be provided at the pre-bid meeting as well.

FACILITIES & OPERATIONS**

11. **DEMONSTRATION:** Demonstration will be required of several products; therefore, in order to receive the bid, the vendors must demonstrate their product in the manner prescribed. There may be occasions when we will test your product using our own personnel; therefore, we would expect the vendor to provide a sample for usage.
12. **PERSONNEL TRAINING:** The successful bidder must agree to provide training for our school personnel without cost to the System if it becomes necessary on any of their products. This would include the application and use of material and equipment. Walker County Schools reserves the right to schedule at least 25 hours of annual custodial staff support training to be conducted by the vendor at our request on certain products. Please include in the bid package a description of how you would conduct this training, and how your company will provide individual support to the custodians.
13. **TAX EXEMPTION:** The Walker County Board of Education is not subject to taxation; therefore, upon request, tax exemption certificates will be furnished, with the exception to Tennessee which if the items are picked up in Tennessee we are required to pay sales tax. All items included in this bid should be delivered and will therefore be tax exempt.
14. **FINANCIAL STATEMENT:** The Walker County Board of Education reserves the right to require any bidder to submit a financial solvency state of rating.
15. **PAYMENT:** Payment will be made from the original invoice after products are received and inspected.
16. **SAMPLES:** The Walker County Board of Education reserves the right to require samples from any bidder for the purpose of testing. If any product fails to meet specifications, the Board will require the vendor to remove all particular products from the Warehouse and reserves the right to cancel the entire bid. Also, the Board may require the vendor to remove the product from areas or surfaces at the expense of the vendor. If this situation occurs, the Board reserves the right to prohibit the vendor from participating in future bids. Please mail samples separately from the sealed bid.
17. **IDENTIFICATION OF PRODUCT:** Each chemical container shall be clearly labeled with the name of the product, manufacturer, directions for use, ratios, and identification and/or batch numbers for floor finish and sealers. Note: This may not be in the form of an attached letter or card, but must be glued to the container. Also, five or six gallon containers must have a closable pouring spout located in the top of the container. Substitution of a product is not permissible. As required by law, Material Safety Data Sheets must be provided for all chemicals. Vendor must be able to provide secondary labels if applicable.
