Technical Specifications

Scope

There are 6 cycles per year (2 Months per cycle) consisting of 40.1 lane miles Bi-Weekly/ Twice a month (4 times per cycle), 22.5 lane miles Monthly (2 times per cycle) and 159.2 lane miles Bi-Monthly (1 time per cycle). The first sweeping cycle under this agreement is scheduled to start in March 2022.

Term of Contract

The initial contract term shall be for a one (1) year period from the date of award. Indian River County ("County") reserves the option to extend the contract for two additional periods of one (1) year each.

Estimated Quantities

There are currently approximately 224 linear lane miles (curb and non-curb) on the inventory. It shall be understood and agreed that quantities designated herein are estimated only and may be increased or decreased in accordance with the actual requirements of the County, and that the County, in accepting any bid or portion thereof, contacts only and agrees to purchase only the services in such quantities as represent the actual requirements of the County.

County may require modifications and changes to this contract, as it relates to quantities, areas, frequency of services, and specified services. The Contractor shall provide the County with the cost for such additional services. All rates shall be in accordance with the unit cost structure submitted by the Contractor to and accepted by the County.

General Specifications and Operations

The Contractor shall provide all labor, materials, equipment, supplies, insurance, bonds and any other requirement necessary to complete the terms, conditions and specifications herein. Some hand work is required in areas that large sweeping equipment will not physically fit, such as pedestrian crosswalks near roundabouts, parking islands/medians/ stops, and other similar areas within the designated work sites.

Bidders are to visit the streets and parking lots named in these specifications and to take note of any varying degrees of difficulty associated with the work. The contractor is to verify, to his own satisfaction, the mileage figures appearing in these specifications. The streets, as described, are to be swept for the prices as bid on the proposal pages; **WHATEVER THE DEGREE OF DIFFICULTY MAY BE.**

The Contractor shall have GPS tracking on all street sweeping equipment. The Contractor shall coordinate with the County to allow County staff full time access to the GPS information produced by the equipment for mapping and verification purposes.

The Contractor is to completely remove from the surface of the street and parking lot areas, all sand, paper, glass, litter, grass and other associated debris to the degree and extent associated with current standard of sweeping excellence. Excellence in street sweeping shall be interpreted as a clean curb line, and in those cases where a median curb exists, a clean median line, free of any visible sand, grass or other debris. The County shall be the sole judge as to the acceptability of the cleaning performed by the Contractor, regardless of the number of sweeping passes required to achieve the specified quality. It is expected that the contractor shall encounter objects that are larger than the mechanical sweeper can capably remove and therefore the Contractor shall use other means (hand

or mechanical) to successfully remove all debris encountered. Special attention to the radius end of medians is required to remove all debris from the pavement. Sweeping is required at intersections where the curb and/or gutter adjoins a street without curb and/or gutter. The Contractor is expected to sweep around such corners in order to effectively clean the gutter and street.

The Contractor shall have a Supervisor available at all times who can be contacted by the County, and who shall keep the County informed as to the Contractor's activities.

Street sweeping service shall be measured for payment by the total number of lane miles (curb and non-curb). The miles shall be calculated to the nearest one-tenth (1/10) of a mile. The Contractor must invoice the County only for the amount of service actually performed. Invoices shall state the cycle number, number of curb miles and spot sweeping miles.

If any locations are added or deleted from the contract, the rate quoted shall be used to determine the adjusted contract price. The County reserves the right to add or delete locations from this contract, at its sole option.

The sweeping operation shall not create excessive airborne dust or other particulates, as determined by the County. It is expected that equipment supplied with functioning water spray equipment normal to the industry for dust control will satisfy the intent of this article.

In the event a street rehabilitation or improvement project is in progress, that portion of the cleaning cycle will be deleted from the route. The section of the streets deleted may be re-entered at the first scheduled cleaning cycle following completion of the work.

Street Sweeping (Streets with curb and/or gutter, and bridge decks)

- Street sweeping will generally consist of sweeping of streets with adjacent curb and/or gutter and bridge decks. This is the primary work to be completed under this agreement.
- All sweeping activities shall take place in the same directions as the flow of traffic. Any activities that take place in contrast to the flow of traffic will be considered a traffic hazard.
- Remove from the surface of County streets, all sand, paper, glass, litter, grass and other associated debris to the degree and extent associated with current standard of sweeping excellence.
- Cleaning method shall be at the option of the Contractor and may be power-operated equipment, hand operated equipment or a combination of both.

Spot Street Sweeping

- Spot sweeping will generally consist of sweeping of streets without adjacent curb and/or gutter. Spot Street Sweeping will generally consist of cleaning of small areas that collect sand and debris after rain events. Sand and debris will typically be concentrated in a relatively small area. Length measurement of areas to receive "spot sweeping" shall be in one tenth (1/10) mile, per lane.
- All sweeping activities shall take place in the same directions as the flow of traffic. Any activities that take place in contrast to the flow of traffic will be considered a traffic hazard.
- The contractor is expected to remove from the surface of County streets, all sand, paper, glass, litter, grass and other associated debris to the degree and extent associated with current standard of sweeping excellence.
- Cleaning method shall be at the option of the Contractor and may be power-operated equipment, hand operated equipment or a combination of both.

Parking Lot Cleaning

Currently no parking lots are scheduled for sweeping. In the event that such a need is identified, the following additional specifications shall apply. Parking lots shall be cleaned of all debris, trash, glass, cans, paper, dirt, sand and other refuse either thrown or otherwise accumulated or disposed of in that lot and behind car stops. Cleaning under parked cars will not be the responsibility of the Contractor. Cleaning method shall be at the option of the Contractor and may be by power-operated equipment, hand operated equipment or a combination of both.

Equipment

All equipment to be utilized by the successful Contractor to perform the cleaning/sweeping services as detailed herein. The sweeping equipment employed by the Contractor shall be of a type designed as a heavy-duty municipal type sweeper. The sweeping equipment shall be equipped with a water system to control dust. The sweeping equipment shall not exhibit an excessive noise level that could disturb adjacent property owners. Attach a list of equipment owned/leased by the Contractor for the purpose of street sweeping with the bid proposal. Such equipment must be approved by the Indian River County Road and Bridge Superintendent or his/her designee for the intended use. Equipment must be equipped, at a minimum, with a flashing amber light and arrow board, both visible for a maximum of one (1) mile, and mounted for maximum visibility. All warning signals must comply with the standards set forth in the Manual for Uniform Traffic Control Devices.

Equipment shall have at least a 74-inch-wide sweep pass and a left and right gutter broom. Sweepers should be capable of removing all normal levels of debris and material from the street and curbside in one pass. The Contractor will not be required to clean under parked cars.

Water

Water required for street sweeping operations under this contract shall be supplied by the Contractor and included in the unit price for sweeping.

Traffic Control

The contractor shall be responsible for traffic control during operations performed by the Contractor's personnel and/or subcontractors. Traffic control shall be in conformance with the Federal Highway Administration, Manual on Uniform Traffic Control Devices, latest edition and the Florida Department of Transportation Roadway and Traffic Design Standards, latest edition.

The foregoing requirements are to be considered as minimum and the Contractor's compliance shall in no way relieve the Contractor of final responsibility for providing adequate traffic control devices for the protection of the public and employees throughout the work areas.

Hours of Operation

Residential areas are to be cleaned during day time hours. Day and/or night operations are acceptable for other areas. The Contractor is required to contact the Indian River County Road and Bridge Division daily with a schedule and route sequence for each unit operating, a minimum of 24 hours in advance at (772) 226-3465 or via email at dvaught@ircgov.com. This will enable the County to inspect the work for acceptance in a timely manner. Schedules shall be arranged to afford minimal interference with traffic.

Disposal of Street Sweepings

The Contractor shall dispose of street sweeping debris at the Road and Bridge material yard located at 4550 41st Street, Vero Beach. If disposing at the Indian River County Landfill is necessary, tipping fees under this agreement

shall be paid the County. Fees for disposal at any other location will not be paid by the County. The Contractor shall be responsible for the hauling and disposing of all sweeping debris. The Contractor shall dispose of all street sweeping debris in a permitted Class 1 lined landfill. The Contractor must submit copies or the original landfill receipts from disposal of the street sweepings along with the request for payment. Contractors may dump out of County at the contractor’s expense, but must still submit landfill records as proof of proper disposal in a permitted Class 1 lined landfill. The landfill records will also be used to track the amount of sweeping debris removed from the County road system. Any attempt to dump material from jobs not covered under this agreement, as if they were from Indian River County work, shall be grounds for termination of this contract.

Damage to Property

The Contractor shall ensure extreme care is used to safeguard sidewalks, curbing, road surfaces and motor vehicles on or around all job sites. Damage to public or private property shall be the responsibility of the Contractor and shall be replaced and/or repaired at the expense of the Contractor.

Termination of Contract

The Contract may be terminated if the Contractor:

- Fails to perform the contracted services in accordance with the terms and conditions of this contract; or
- Neglects or refuses to correct any work that has been rejected by the Indian River County Road and Bridge Superintendent or his/her designee; or
- At any time, in the opinion of the Indian River County Road and Bridge Superintendent or his/her designee, that the Contractor unnecessarily delays the completion of the contract.

The Contractor shall be notified in writing of Indian River County’s intent to terminate the contract. The notification shall state the necessary remedial action required by the contractor. If remedial action is not taken by the Contractor within fourteen (14) calendar days upon receiving such notification, Indian River County may cancel the Contract.

Frequency of Service and Time Frame for Work Completion

Each sweeping cycle shall be performed and completed within the scheduled cycle timeframe, beginning with the start dates listed below. Indian River County may terminate to contract because of delays in finishing the work for each cycle. The contractor will notify the County the following working day of all work completed the previous day. Upon completion of a cycle of work, the County agrees to perform inspection of the reported work within two (2) working days following the report of work completion. Any work not found to be satisfactory to the County shall be reported to the Contractor within that same period. The Contractor agrees to finish all work to the satisfaction of the County, at no additional cost, prior to receiving payment for such work.

The Contractor is required to contact the Indian River County Road and Bridge Division at (772) 226-3465 or via email at dvaught@ircgov.com, a minimum of 24 hours in advance with a schedule and route sequence for each unit operating.

No partial payments will be authorized. Invoices must include the location that the street sweeping material was disposed of.

Areas of Service

Areas of Service include those areas specifically designated herein or which may be added. The County shall furnish the contractor with an inventory of the areas that require sweeping. The inventory is subject to change without notice to the Contractor.
