RE: Peralta Community College District's Merritt College Child Development Center Project

Ms. Griffin,

Millennium Consulting Associates has provided naturally occurring asbestos consulting services for the Merritt College Child Development Center (CDC) Project. These services included the review of project-related data to determine if NOA is or likely to be present at the site.

Based on the review of the project-related data and a review of the geology at the site, it was determined the CDC site is not subject to the California Air Resources Board (CARB) Asbestos Toxic Control Measure (ATCM) for Construction Grading, Quarrying and Surface Mining Operations (17 CCR §93105). This was also confirmed during a site visit with Mr. Dick Rodriguez, Air Quality Specialist II, of the BAAQMD on October 13, 2021.

If you have any comments or questions, please do not hesitate to contact our office.
